FOREWORD

The recent expansion and improvement of M. S. M., as shown in this edition, will have a great influence on the advancement of the engineering profession. Through these additional facilities our graduates will be better prepared to make their contributions to industry, government, and society.

New Mechanical Engineering lab.

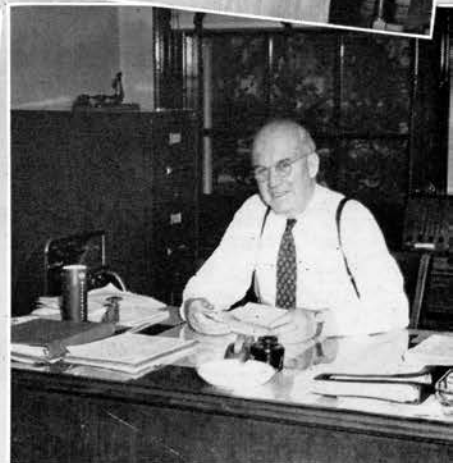

The engineering profession is subject to rapid changes, which influence the training requirements of future engineers. In this section are shown the departments and their measures taken at M.S.M. to parallel the demands of industry.

ACADEMICS

Dr. Frederick A. Middlebush

**President School of Mines
and Metallurgy**

University of Missouri

Message from President Middlebush

The increasing dependence of our way of life upon scientific and technological developments demands the constant improvement and enlargement of educational facilities. The graduates of the University of Missouri School of Mines and Metallurgy over the years have made outstanding contributions to such developments. Those of us who are vested with the administration and planning of the program of the School of Mines and Metallurgy are determined that future graduates of our School shall be well equipped to continue similar contributions.

While we are gratified with the work done with the facilities presently available at the School of Mines and Metallurgy, we recognize the constant need of expansion of these facilities. Nearing completion is the first unit of a dormitory system which we hope will eventually include a more modern Student Infirmary and a Student Union. Also nearing completion is a well-equipped Mechanical Engineering Laboratory Building which will fill a need long recognized in our educational program. Underway, probably by the time this ROLLAMO is ready for distribution, will be an extensive program of additions to and remodeling of present buildings which will directly benefit the departments of Mining Engineering, Metallurgical Engineering, Drawing, Ceramic Engineering, Geology, Mechanics and Civil Engineering. Engineering Drawing will be moved to the second floor of Mechanical Hall and Mining Engineering to the first floor. An annex is to be constructed between Mechanical Hall and the present Mining Building. Geology will take over the third floor of Norwood Hall vacated by Drawing, and will thus add much needed space for this important department. Remodeling and additions to the Experiment Station Building will provide for Metallurgical Engineering and Ceramic

Engineering under one roof. Mechanics will move its laboratories from Harris Hall to the present Metallurgy Building. Civil Engineering will then have available additional space in Harris Hall.

Plans for the eventual completion of the Engineering Laboratories Project include a new building immediately north of the new Mechanical Engineering Laboratory Building to provide laboratory and classroom facilities for Electrical Engineering. Physics will then expand to occupy all of the first floor and basement of Norwood Hall. Funds for the completion of rooms in the new Chemical Engineering Building will be recommended for a legislative appropriation in the very near future. An additional boiler and generator for the new Power Plant will likewise be requested again. Additional library space is sorely needed and plans to add to that space are under consideration as are plans to improve the athletic field as soon as practicable. Other departments and activities are included in the long range planning program which is constantly before us and which of necessity is being continually revised.

The Physical Plant expansion program outlined above is in keeping with our desire that a quality program of high order should always be maintained. We must have at hand the tools with which to maintain a high level of competence in instruction and research. Through the maintenance of high quality work on the part of the staff and members of the Student Body, your degrees will be assured of their proper prestige and value.

FREDERICK A. MIDDLEBUSH,
President.

Board of Curators

The Board of Curators of the University of Missouri and the Missouri School of Mines and Metallurgy is composed of nine residents of the state of Missouri appointed by the Governor and confirmed by the State Senate. In order to insure a true representation, not more than one man may be appointed from the same congressional district, and not more than five curators may belong to any one political party.

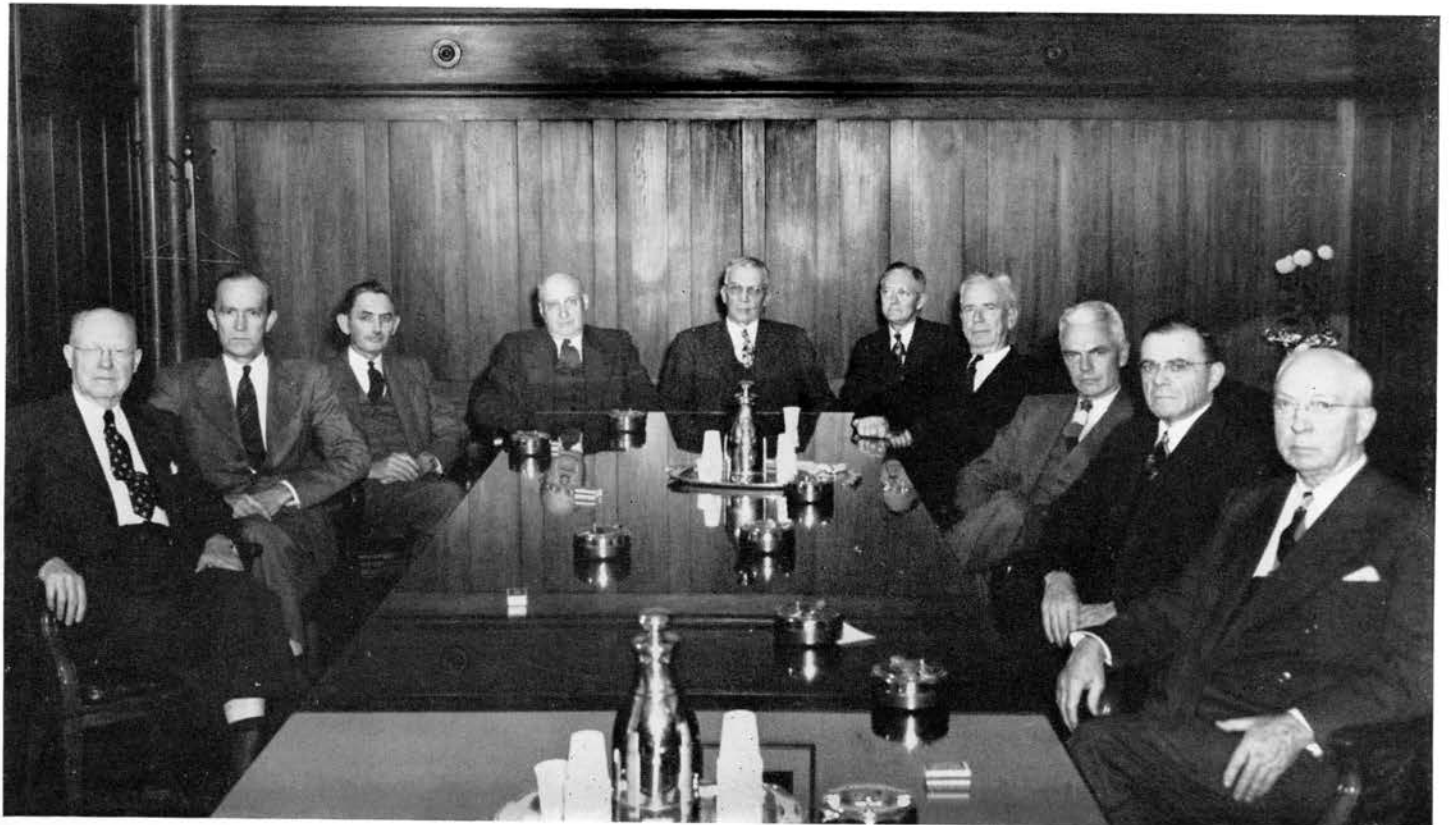

Appointments are for the duration of six years, with each member of the board being eligible for reappointment when his term ex-

pires. Thus, some of the board members have many years of experience.

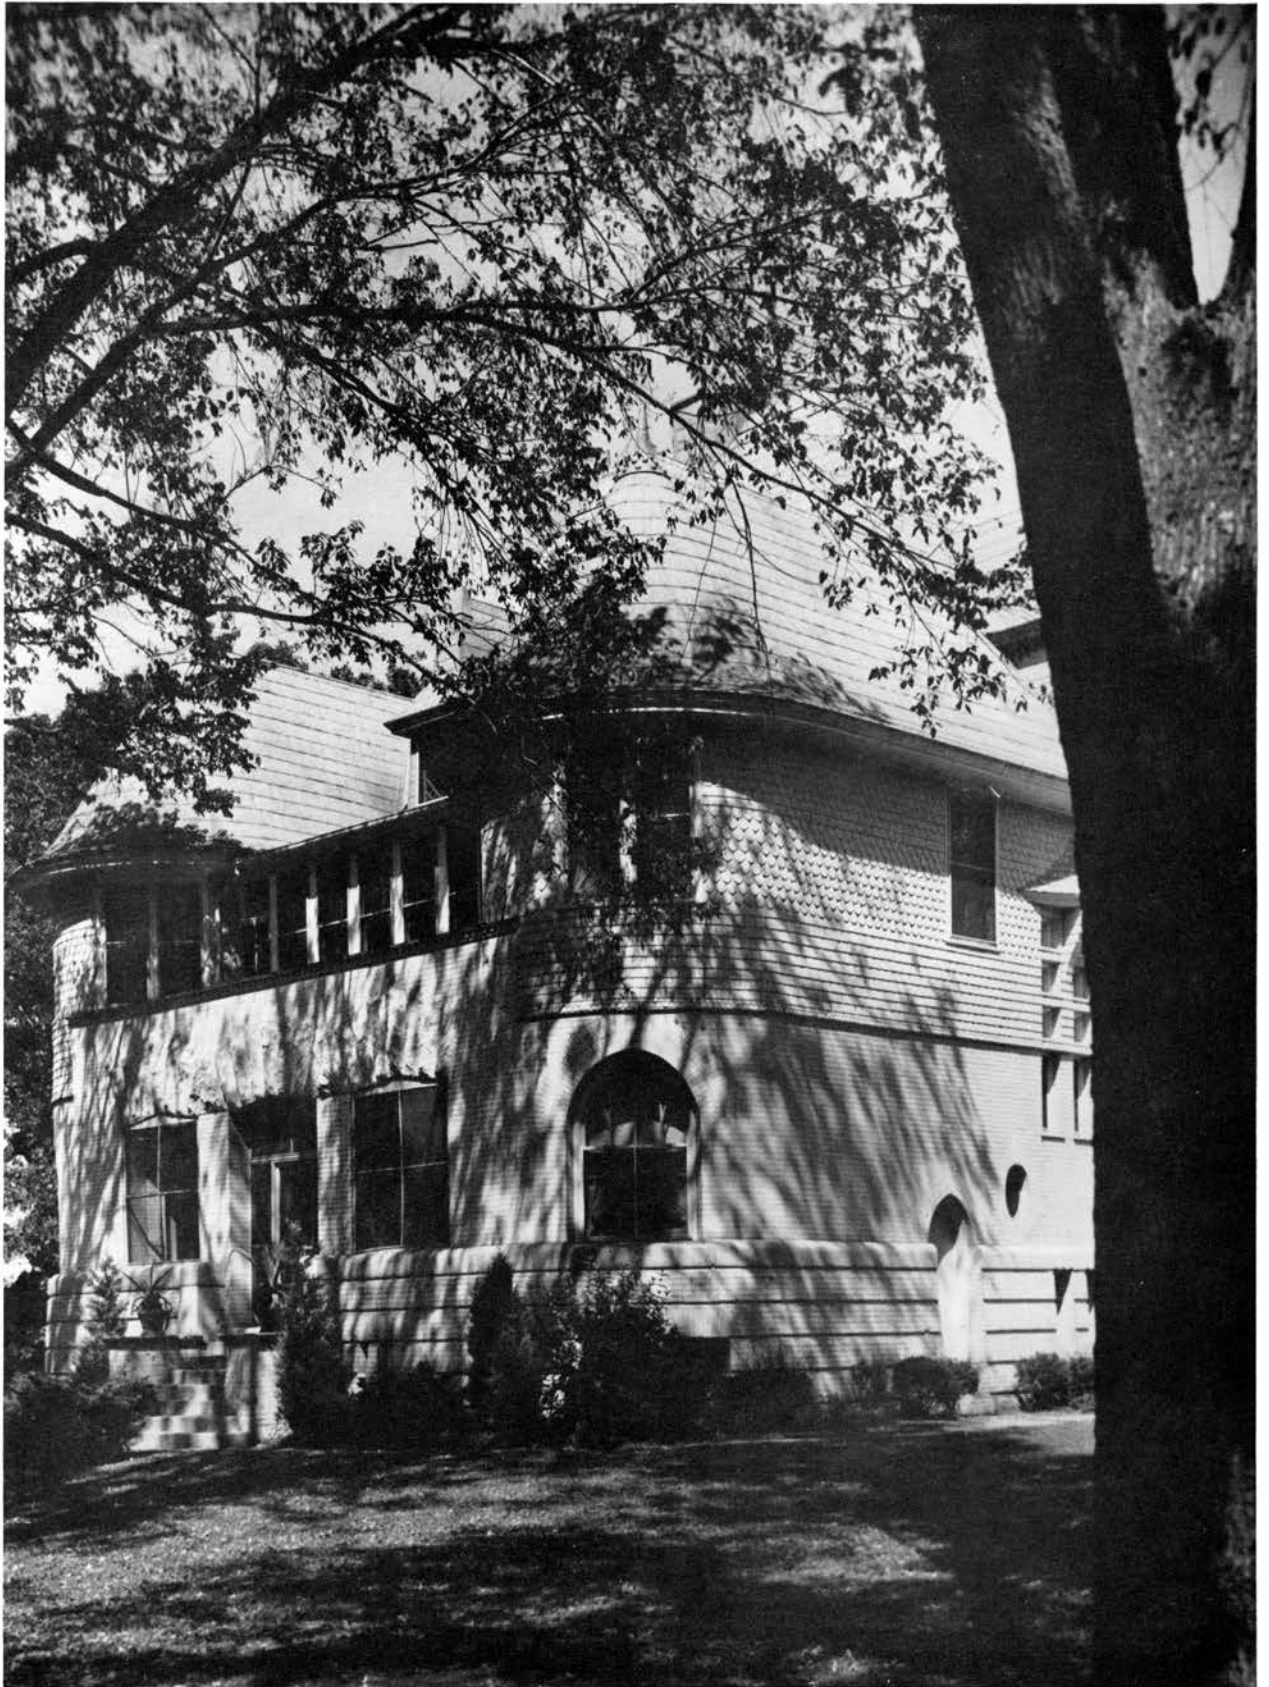

Each year, the members of the Board of Curators appoint three of their number to serve as the Executive Committee for the Missouri School of Mines and Metallurgy. This committee meets monthly for the purpose of auditing claims and attending to other such business given them by the Board of Curators. Frank C. Mann is chairman of the present Executive Committee. The other two members are Stratton Shartel and Guy A. Thompson.

Dean's Residence

Curtis L. Wilson

Dean
Missouri School of Mines
and Metallurgy

Dr. Curtis L. Wilson became Dean of the Missouri School of Mines in 1941. During this time he has done an excellent job of increasing the merits of M.S.M. Under his leadership the school has secured a new power plant, an addition to the Chemical Engineering Building, and a new dormitory for the students. Work has also been started on an engineering laboratory building.

Dean Wilson received his E.M. in 1920 at the Montana School of Mines and his Ph.D. in 1928 at the University of Goettingen. He was a professor at the Montana School of Mines prior to the time he came to M.S.M.

"Speech! Speech!"

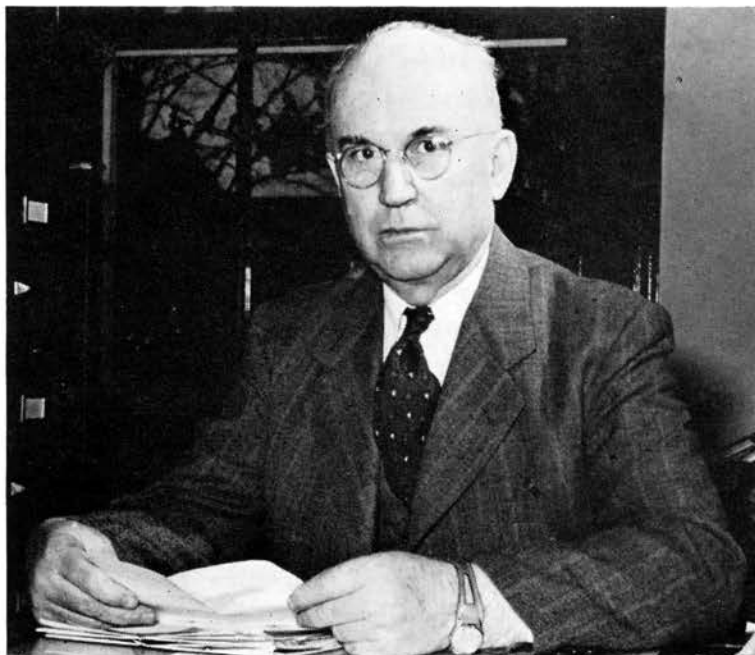

Dean Wilson is a member of the American Institute of Mining and Metallurgical Engineers and is now one of the A.I.M.E. Board of Directors and chairman of Mineral Industry Educational Division. He is a member of the Missouri Society of Professional Engineers and is serving as chairman of the society's committee on education.

Rex Z. Williams

Assistant Dean

Dean Williams and his office staff are asked to perform many services related to the welfare of the undergraduate student. Freshmen are introduced to the school by the orientation programs under his supervision. Also under his direction are student counseling services, the scholarship committee, coordination of extra-curricular activities, and the presentation of certain scholarships and awards. Graduating seniors are thankful for his excellent work as director of the job placement service.

Although his responsibilities as Assistant Dean are numerous, Dean Williams is also chairman of the Mechanics Department. Here his superior teaching ability has made him a student favorite.

Noel Hubbard

Registrar

The problems of the Registrar are fast changing as the expansion of the school takes place. Mr. Hubbard's twenty-seven years of experience with the school have given him the judgment necessary to provide sound guidance to students at our growing institution. A headline in the *MISSOURI MINER* heralding registration at the beginning of the second semester announced, "Ma Hubbard Opens Cupboard Tuesday." This part of Mr. Hubbard's responsibilities is an important feature in the smooth operation of the school.

Mr. Hubbard's genuine interest in the problems of each of the many students who come to him for advice has given him the sincere respect that he deserves.

Harry J. Fields **Business Manager**

Mr. Fields first began his employment at M.S.M. in January, 1946, as auditor, and, in the course of several months, acquired his present status as business manager. Since he took over this position his job has been increasingly difficult because of the intensive building program and the greatly expanded enrollment. As a result of this high enrollment, and the corresponding wear upon the school buildings, maintenance problems have become increasingly vexing.

In all, the total volume of expenditures has increased to three times that of normal years. Mr. Fields has done an excellent job in coping with the added difficulties confronting his position.

Ernest P. Hendrix **Superintendent of Buildings and Grounds**

A man who is very much on the "inside" in the new M.S.M. construction program is Ernest P. Hendrix, Buildings and Grounds Superintendent. Mr. Hendrix has the essential job of acting as coordinator between the school and the contractor. He is thoroughly familiar with the requirements of each of the new buildings, and with this knowledge acts as the school's official advisor to the construction firm.

Mr. Hendrix has been connected with the School of Mines since 1943. During this period he has become one of the key men on the M.S.M. administrative staff.

J. DONALD FORRESTER
Department Chairman
Professor of Mining Engineering, 1944.
B.S. 1928, Utah; M.S. 1929, Ph.D. 1935, Cornell.

As in the past the Mining Department, under the direction of Dr. J. D. Forrester, has remained one of the foremost departments at M.S.M. Four hundred and fifty future engineers are now enrolled in the Mining Department studying a diversity of courses offered by the department. A class of about 150 mining students will graduate this year, one of the largest groups that the Mining Department has ever had.

Classroom work is supplemented by fully equipped laboratories, located in the mining building, which give the students a complete course of study in practical mining problems. In addition to classroom and laboratory facilities the Mining Department provides a full scale experimental mine in which students can engage in the actual practice of mining and tunneling. The mine has recently been improved by work done on it last summer.

The Mining Department is comprised of eight full-time faculty men, each of whom is well trained in the engineering profession in gen-

eral and particularly qualified in specialized parts of a field. This results in a staff capable of affording well-rounded basic instruction and also of offering extraordinary schooling in particular professional areas of the student's choice.

Along with the general trend of expansion and improvement at M.S.M., the Mining Department has altered and increased the number of courses and is now giving a more complete education in mining. The department has been aware for some time of the trends in industry leading to specialization and to resulting needs of more complete approaches to the study of Mining Engineering and Petroleum Engineering practices. To meet the requirements of offering a more comprehensive training and thus afford as wide opportunities as possible to students for work in their chosen engineering profession, the department recently has crystallized new courses of study in the three optional fields of Mining Engineering; namely Mining, Mining Geology, and Petroleum Engineering.

Ready to sight in.

Rex giving advice.

Mining Engineering Department

As a result of the changes, it is now possible for a student to study specifically the field of mine operation from the standpoint of metal mining, coal mining or mining economics. In the Mining Geology area, which treats primarily with exploration and appraisal methods of mineral deposits, the student is afforded the opportunity to specialize in either the metal mining branch or petroleum field. In the Petroleum Engineering training, the curriculum has been improved by instituting new courses in "Petroleum Engineering Stoichiometry" and "Underground Behavior of Hydrocarbon Compounds". These changes are in keeping with the most advanced practices followed in other petroleum engineering schools.

It is felt that the constructive changes which have been made will contribute to the welfare of all students interested in mining. The new courses of study will go completely into effect at the beginning of the fall term next September.

FACULTY

A. I. M. M. E.

The Student Associate Chapter of the American Institute of Mining and Metallurgical Engineers was established on the campus over thirty years ago with the purpose in mind that students of the mining and metallurgy departments might better discuss the problems currently confronting their industries. At the monthly meetings prominent members of the mining and metallurgical professions present the latest developments in their fields and attempt to answer some of the countless questions which are of interest to the members of the organization.

Mechanical Engineering Department

AARON JEFFERSON MILES
Department Chairman
Professor of Mechanical Engineering,
1930, 1943.
B.S. 1930, M.S. 1931, Missouri School of
Mines; Sc. D. 1935, Michigan.

In keeping with the expansion program being carried out by all departments, the Mechanical Engineering Department has a large and extensive development program under way at the present time which will greatly alleviate the inadequate and crowded conditions now prevailing in Mechanical Hall.

To remedy this condition, a new building is being erected which shall house the mechanical engineering laboratories exclusively. This building is to be located south of Mechanical Hall, taking the place of the old power plant, which has been torn down. The groundwork for this building has been completed and construction started. Tentative plans call for the completion of this Mechanical Engineering laboratory by the start of the fall semester, 1950. The cost when completed shall be five hundred thousand dollars.

This new Mechanical Engineering laboratory is being constructed by the McCarthy Brothers Construction Company of St. Louis, Missouri. The two-story building, when completed, shall measure one hundred and

Gas welding.
Chase at work.
Arc welding.

Cutting torch.

"It's a miracle."
A new machine.
Scofield, in Power Plants.
Lots of handles.

forty-five feet in length by one hundred and six feet in depth.

Its design is such that it shall be suitably adapted for all the Mechanical Engineering laboratory courses. The ground floor shall consist of the general Mechanical Engineering laboratory section with the entire southern end of the ground floor to be used as the machine shop. Adjacent to the machine shop and along the east side of the building shall be the tool room. Along the entire southern portion of the second floor there shall be a welding shop. Along the north, east, and west walls of the

second floor there shall be a mezzanine, the space being utilized as rooms for conducting research work.

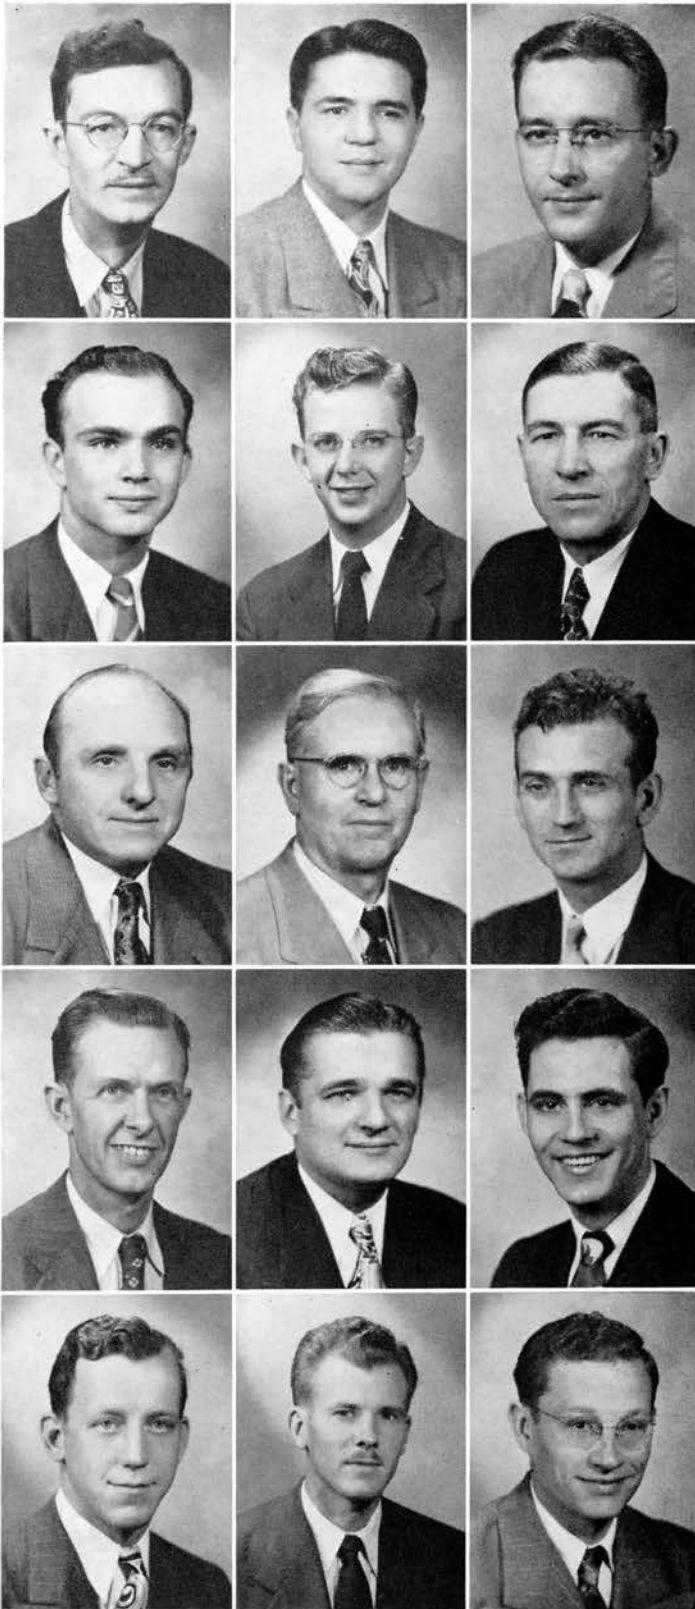

When this building is finished and completely furnished with new equipment, there is every hope that the Mechanical Engineering Department shall become a recognized department of the Missouri School of Mines and Metallurgy.

Dr. A. J. Miles, chairman of the department since 1943, and other outstanding members of the Mechanical Engineering Department have zealously strived to attain this recognition.

Mechanical Hall.

The student branch of the American Society of Mechanical Engineers has experienced a busy year from its initial meeting to the annual spring banquet. The members of the student branch are proud of the successful completion of its first project—that of building an iron lung for the new county hospital. The iron lung was presented to the city of Rolla on January 16, 1950.

Harris Hall.

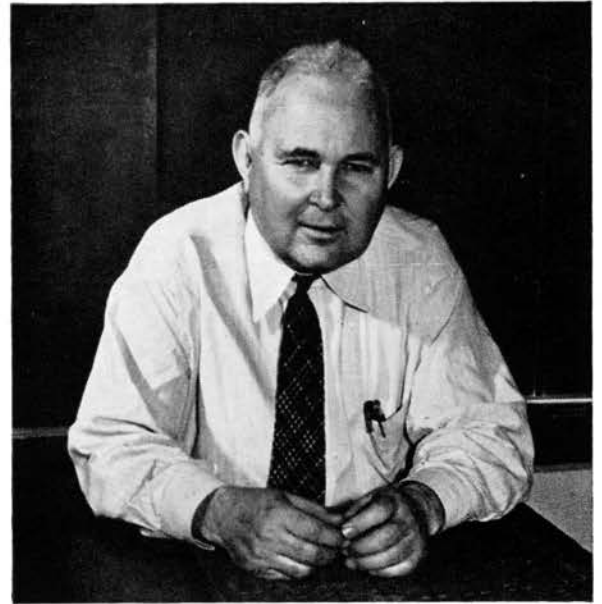

Civil Engineering Department

Civil Engineering is as old as civilization itself. In fact, it is only a few decades since the only branches of engineering recognized were Military, devoted to warfare, and Civil, building for peace. Civil Engineering was employed centuries ago in the construction of such vast works as the Egyptian pyramids and the great works of old Rome.

Within the walls of Harris Hall, the Civil Engineering Department attempts to convey these age-old principles to hopeful C. E. students. Along with the standards of old, the department offers present-day practices in the field of Civil Engineering.

The competent staff of the C. E. Department is headed by Professor J. B. Butler, who has been with the M.S.M. faculty since 1920 and has given many years of faithful service to the school. Professors Carlton, Eshbaugh, and Gevecker are also old standbys in the department.

In keeping with the expansion of the rest of the school, the capacity of Harris Hall has been increased greatly by utilizing the entire building. This gives the department more much-needed room and increases the facilities of the department.

The Student Chapter of the American Society of Civil Engineers accomplishes its purpose of acquainting all interested students with modern engineering practices and developments by inviting outstanding professional men as featured speakers at the society meetings.

Under the able sponsorship of Professors E. W. Carlton and J. Kent Roberts and capable officers the society has had a very successful year. Delegates from the chapter attended the Mid-Continent Conference at Lincoln, Nebraska, and the Missouri Society of Civil Engineers annual banquet in St. Louis. The year's activities were climaxed by a banquet held in honor of graduating seniors, at which Dean Wilson was a most entertaining speaker.

Norwood Hall.

Norwood Hall is the home of the largest department on the campus, the Electrical Engineering Department. Many new opportunities in industries have created an increasing enrollment in this department. Every day new fields are opening up for electrical engineers.

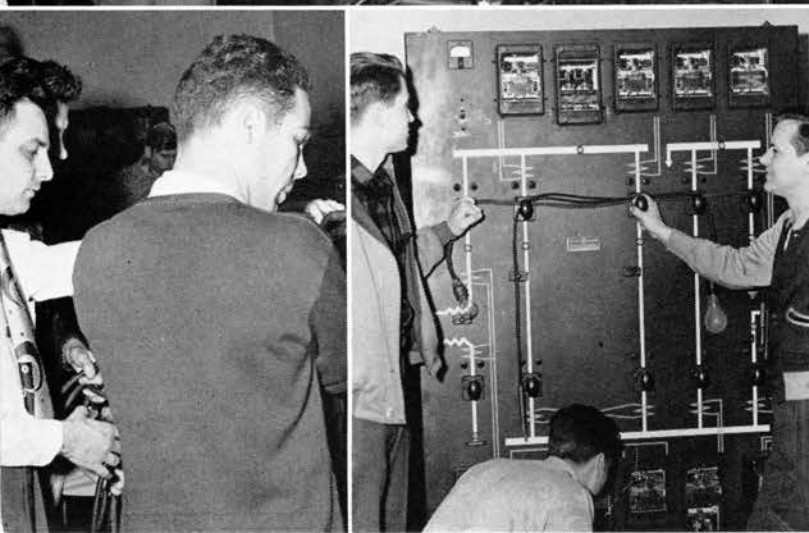

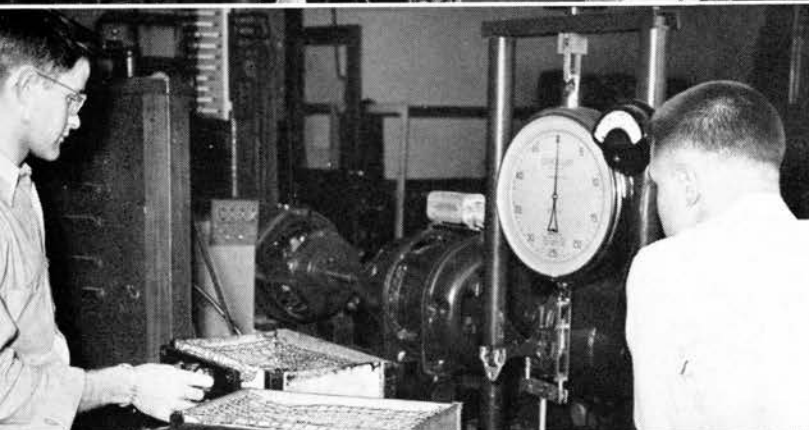

The theory learned in the classrooms is used in the laboratory which presents fundamental electrical testing methods, as well as habits of accurate observation and experience in the preparing of technical reports.

The curriculum is so arranged that most of the required courses providing the basic fundamentals for all fields of electrical engineering are completed within the first three years. This arrangement permits the senior to select his courses from a large group of electives, thereby enabling him to concentrate his final efforts in the specific field in which he is interested.

New equipment has recently been received by the electrical department. Over \$8,000 of machines and generators were bought by the department in the last year. A new television set was also received and is being set up in the laboratory for future class work. One new course is being offered this semester, Electrical Engineering Design. Several Junior courses have been changed. Other changes affecting the number of electives have been made.

The laboratories of the Electrical Engineering Department occupy space in the basement and on the first floor of Norwood Hall. Their power requirements, from 6 to 220 volts, are supplied by various generators and batteries.

The electrical machinery includes compound, shunt, and series motors and generators; induction motors, both single and polyphase, with squirrel cage or wound rotors. Also, the induction motor group includes an adequate

supply of representative types of variable speed motors. Numerous alternators, both single and polyphase, of representative types are available. For loading purposes both pony brakes and electric dynamometers are provided along with a wide variety of load rheostats.

The electronics, communications and measurements laboratories contain a variety of vacuum-tube regulated and unregulated power supply units as well as numerous types of constant voltage transformers with which to augment the main laboratory power supply.

The experimental equipment consists of typical linear and nonlinear amplifier stages, a large variety of oscillators covering a broad range of wave types and frequencies; transmitting and receiving equipment; typical photo-electric cell circuits; dielectric heating equipment; automatic welding controls; gas tube power supplies (single phase and polyphase); cathode ray tube circuits; microwave equipment.

Measuring apparatus consists of an excellent assortment of vacuum-tube voltmeter, multi-meters, Micromax and Esterline-Angus recording meters, precision measuring devices for frequency, capacitance, and inductance, cathode-ray oscilloscopes, standard cells, as well as the usual d'Arsonval, iron vane and thermocouple types of meters.

A student in the electrical department starts in his Sophomore year by taking two courses. These courses pertain to the study of magnetic fields. In the Junior year he becomes deeply involved in alternating and direct current machinery, electronics and power transmission. The Senior year largely consists of electives pertaining to the field that he has chosen.

The innumerable applications of electricity in all fields of engineering give rise to the need for training all types of engineers in the principles of electrical engineering. Consequently, considerable work in the department is concerned with various classroom and laboratory courses in the principles of electrical engineering for students whose major interests are in other branches of engineering.

Professor I. H. Lovett is in his second year as chairman of the department. He has been active on the department staff since 1921 and is familiar with its operations. He is very well liked by the students and gives all the students reliable advice.

Edward Erdelyi, Roger E. Nolte, Walter Graham, and Gerald F. Sinnamon.

The space of the electrical department is very limited but with the construction of the new laboratory building the electrical department is hoping for a little more room so that it may expand and buy more new equipment.

A. I. E. E. - I. R. E.

Continuing its policy of encouraging the students to interest themselves in non-academic aspects of electrical engineering, the joint AIEE-IRE branch this year has fostered the development of an undergraduate student research program.

Students working in this program have prepared papers based on their research and experimental work, and presented them to the group in a local competition. The winners of this contest then represented the organization this spring at the AIEE Southwest District meeting as well as at the AIEE St. Louis Section meeting.

Naturally the year has provided the usual number of excellent speakers from industry, the spring picnic, the annual banquet, and the joint meeting of Missouri branches and the St. Louis sections.

Chemical Engineering Department

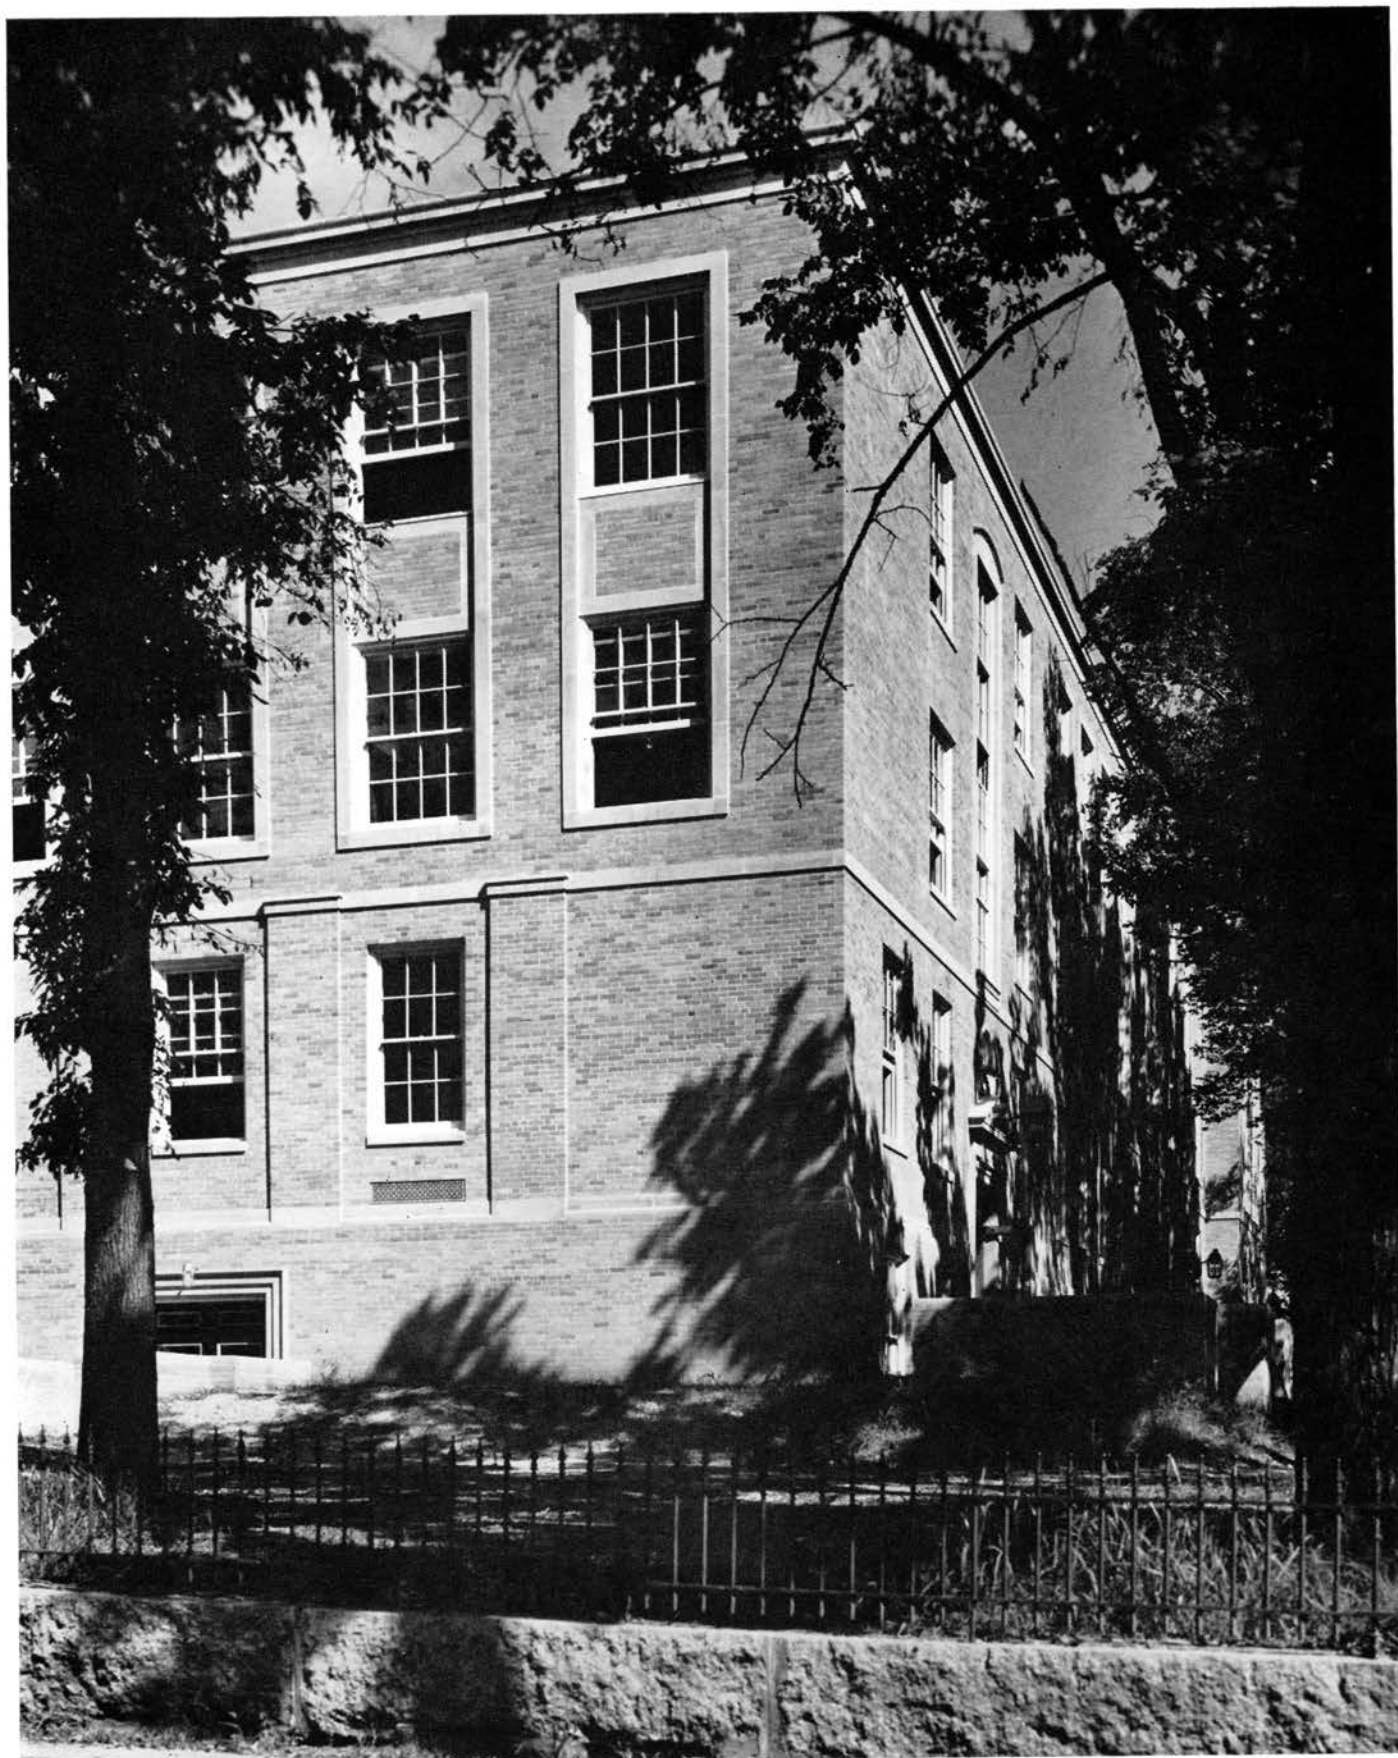

The Chemical Engineering Department here on the M.S.M. campus, under the able leadership of Dr. Walter T. Schrenk, has made great strides in the past year in keeping up with new developments in industry. Chemical Engineering, already the most diversified field of engineering, is constantly changing, necessitating change in the training of those to enter the field.

The completion of the Chemical Engineering building enabled the department to install new equipment for new courses, provided space for conducting research projects, and stimulated graduate work at M.S.M.. The graduate enrollment is now much greater than it has ever been and several research projects are being conducted by graduates and members of the faculty.

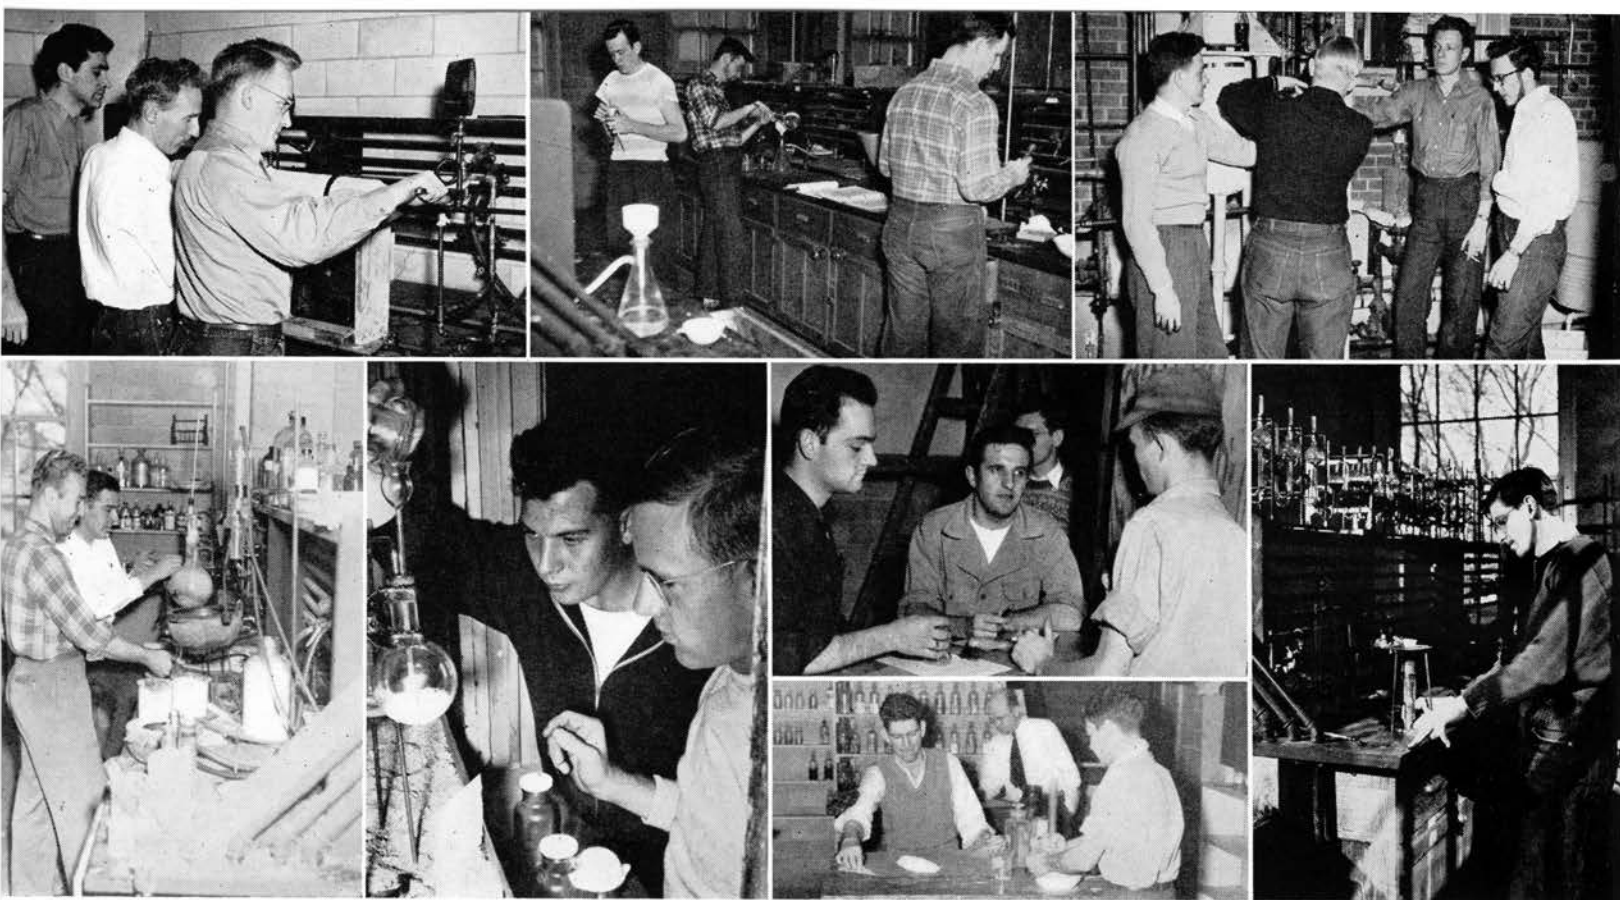

The faculty of the department has been bolstered considerably to meet with the demands of the expansion programs. Judging from the number of Ph.D.s on the Chemical Engineering faculty, it's Profs. are the most learned men on the campus.

WALTER THEODORE SCHRENK

A. I. Ch. E.

The Missouri School of Mines student chapter of the A.I.Ch.E. provides opportunities for the professional development of students majoring in Chemical Engineering by featuring outstanding scientists and men of the profession as speakers at its regular meetings.

The past year has been the best year enjoyed by the chapter since its founding. The total membership was the largest in the history of the organization. The traditional fall and spring outings were well attended and very enjoyable.

A large delegation from the M.S.M. chapter attended the Regional Convention of A.I.Ch.E. at the University of Nebraska. The next convention will be held at the Missouri School of Mines.

Metallurgy Building.

Visitors to the Metallurgy Department during the Engineers Day activities last fall were fascinated by the operations of the cast metals foundry in the basement. Sand molding, melting, and casting processes conducted by Metallurgy students held the interest of the large crowd which gathered.

The foundry represents the first in a planned series of improvements and innovations. A new course in Foundry Engineering was offered for the first time in the spring semester, open to any interested student. Under the direction of Dr. D. S. Eppelsheimer and Mr. G. H. Wagner, M.S.M. becomes one of the few colleges offering a course in foundry theory and practice.

Metallurgical Engineering Department

Metallurgical Engineering Department

During the year, the Foundry Educational Foundation gave the school funds for the provision of scholarships to men interested in the foundry as a career. These scholarships are available primarily to undergraduates, rather than being strictly a graduate presentation.

Also on the expansion program are additions to the facilities in Mineral Dressing and in Process Metallurgy. These department branches are under the direction of Professor A. Legsdin and Dr. A. W. Schlechten, respectively.

In the graduate field, work is being conducted in vacuum metallurgy and in the study of metals by X-ray diffraction methods. These and others constitute the extensive work being done by graduate students in the department.

WALSH, DAVID FRANCIS, Assistant Professor of Metallurgy, 1925, 1928. B.S. in Met. 1923, M.S. 1924, Missouri School of Mines.

WINSTON, JOHN S., Instructor in Metallurgy, 1949. A.B. 1937, Cornell; A.M. 1939, University of Chicago.

Metallurgy is defined as that branch of engineering which employs the arts and sciences of extracting the metals from their ores and concentrates, refining these metals, the manufacture of these metals and their many alloys, and fabricating them into shapes and objects for the use of mankind. When it is possible to imagine what the world would be like if there were no metals for use in machines or construction, the utmost importance of this phase of engineering can be realized. Here at M.S.M. the prospective Metallurgical Engineer receives a thorough training in theory and practical application of metallurgy to develop sufficient knowledge that he might best serve his fellow men.

Chairman of the Metallurgical Engineering Department is Dr. Albert W. Schlecten, who came to M.S.M. in the fall of 1946. He has been chairman since 1947.

The student chapter of the American Society for Metals was established on the M.S.M. campus in October, 1937. The object of the organization is service to the members by promoting the arts and sciences connected with either the manufacture or treatment of metals, or both. Lectures given by prominent members of the metallurgical profession and monthly publications serve to keep the members abreast of the latest developments in the field of metallurgy.

Under the able leadership of the officers and interest of the members who have served the organization in the past, the membership has increased to an all-time high of 137.

As the field of metallurgy broadens, this organization will continue to grow and hold a place of primary importance to the metallurgical engineering members.

Ceramic Engineering Department

As the other departments of our school are expanding and procuring new equipment, so is the Ceramic Department. Some of this new equipment has already been purchased and some is on order. This equipment shall aid both the graduate and the undergraduate students of the department in their laboratory classes.

Last June the department obtained a General Electric spectrophotometer, which is being used by the graduate students. It is but one of two hundred such instruments in use in this country. The Ceramic Department is the only one of all the colleges, which teach Ceramic Engineering, to have such an instrument in use at the present time. In this instrument the standard and sample are viewed by a photoelectric cell, the amplified current from which is used to adjust the light beams until equal quantities of light are reflected from standard and sample. The reflectance curve is drawn automatically on a sheet of coordinate paper. From this the dominant wave length and purity of many ceramic materials may be established.

PAUL G. HEROLD
Department Chairman
Professor of Ceramic Engineering, 1936, 1944.
B.Cer.E. 1931, M.S. 1932, Ph.D. 1934, Ohio State University.

Sifting clays.

*Shopher operating a
load machine.*

Ceramic Engineering Department

During the past summer the department put into operation a carbon monoxide disintegration apparatus for determining the effect of CO on refractory samples. The equipment is designed to use CO from tanks or to take CO made by reacting formic acid and phosphoric acid. The laboratory class in refractories is now using this machine in testing some of the fire clay batches on which they are working.

A new load machine has been ordered for testing modulus of rupture and crushing strength samples. The old Riehle testers are long past their best service and will be thrown out. The new machine will give more accurate and more rapid determinations.

A densitometer is being designed and will be built in the Mechanical Engineering Department. This equipment is used to measure the intensity of diffraction lines on x-ray films so that crystal structures of new materials can be accurately determined.

Sedalia firing ceramic ware.

American Ceramic Society

In 1937 the M.S.M. Student Branch of the American Ceramic Society was activated by students in Ceramic Engineering, who at that time composed the local "Orton Society".

The purpose of the organization is to bring students of Ceramic Engineering into a closer bond of fellowship and to bring others interested in the industry into closer contact with it. In this regard, the organization sponsors meetings at which motion pictures concerned with the ceramic industry are shown and interesting talks are made by men prominent in the field.

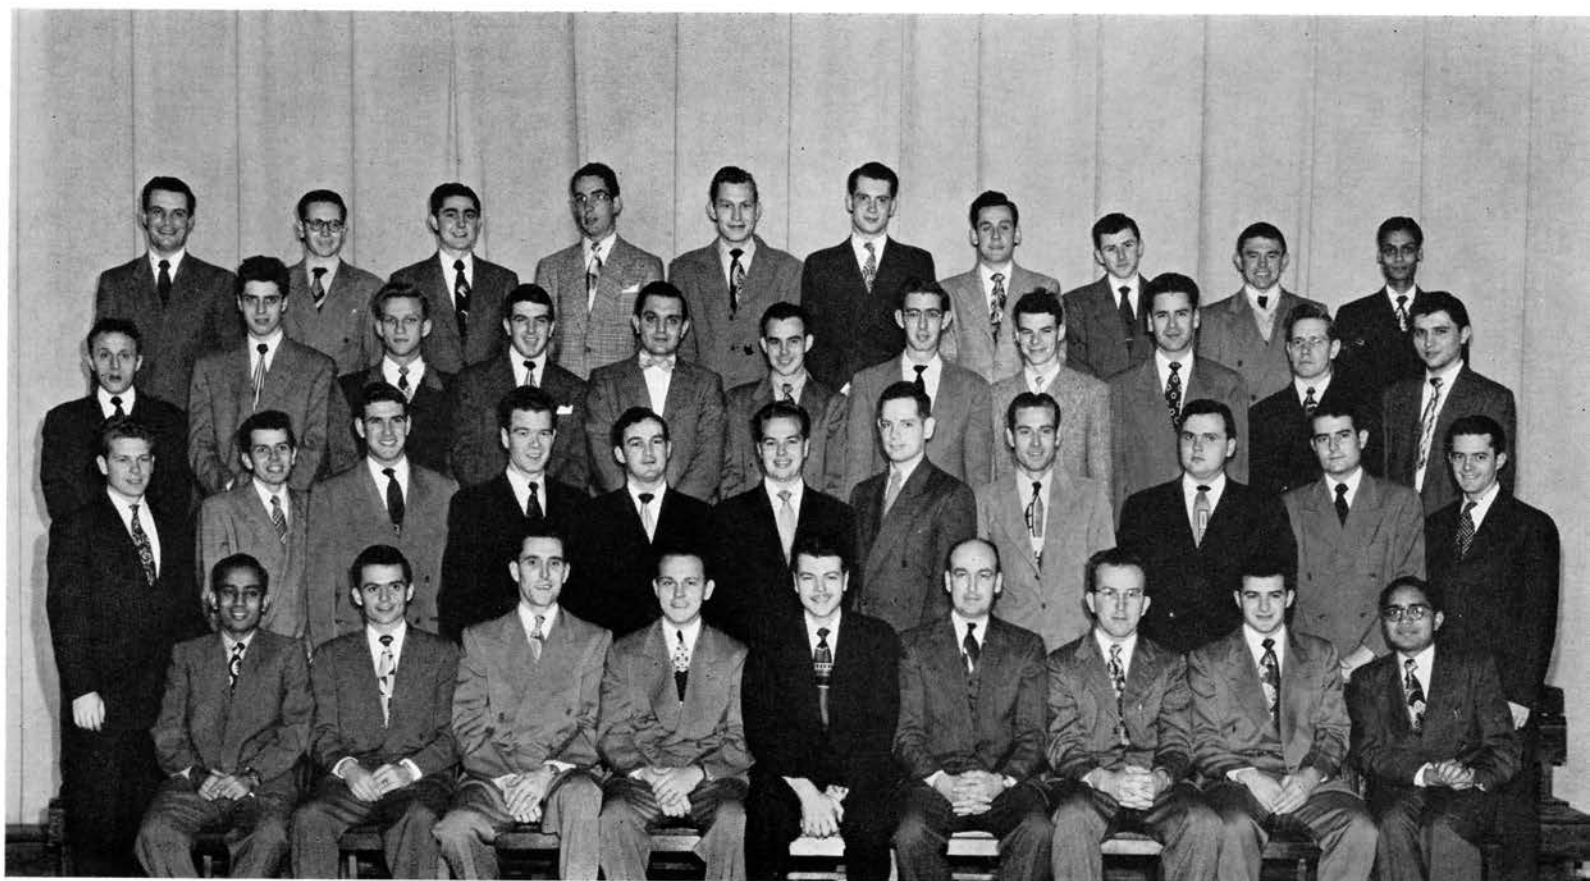

The society thus serves in the capacity of correlating social and intellectual activities of its members.

Rolla Building.

One of the most important departments on the campus is the Mathematics Department. The study of Mathematics is required of all regular students during the Freshman and Sophomore years. Certain courses beyond the basic requirements are required by various departments. Elective courses are offered in advanced calculus, theory of equations and other subjects closely related to engineering.

The students start with Algebra and Trigonometry the first semester, Analytic Geometry which is a study of point, line segment, straight line formulas, and other similar equations. In the Sophomore year the student runs into the calculus, differential and integral. Differential calculus deals with maxima and minima of functions, differentials with applications to rates and related topics, successive and partial differentiation. The problems are chosen from the various fields of engineering where possible. Integral calculus is sometimes said to be differential calculus backward, which is about the best way to explain it. Electrical Engineers are required to take Differential Equations. This course puts special emphasis on problems related to engineering.

The Freshman hears about it, the Sophomore struggles with it, and the Junior and Senior remembers it well. Physics proves to be a big challenge to the engineer. It is a basic science that has importance in all fields of engineering.

The task of presenting the concepts of mechanics, heat, electricity, and light is the job of Dr. Harold A. Fuller and his staff of physicists.

Of high interest are the lectures employing the use of a large store of gadgets and equipment. Another item of interest is the course in "Theory of Measurements", which is an "extra" not commonly offered in colleges.

Engineering Drawing is the graphic language used in the industrial world by engineers and designers to express and record the ideas and information necessary for the building of machines and structures. To enable the young engineer to understand and use the principles thus involved, the Engineering Drawing Department introduces the elementary concepts to the beginning engineering student. After the fundamentals are well established, the student becomes acquainted with the further developments which are to be accomplished in the field of graphic and pictorial representation.

The fundamental idea of the drawing courses are to enable the student to both make and read drawings. In any phase of engineering, the engineer might be called upon to utilize the ideas of another man or to put his own ideas into such a form as to be readily understood and accepted by another person. These basic ideas of orthographic, isometric, and oblique projection of lines, planes, and objects are presented in the initial year of Engineering Drawing. The advanced courses offer an opportunity for the individual student to delve further into the accepted practices of his particular field of engineering. These are included in such courses as Architectural Drawing, Drawing of Maps and Structures, City Planning for the Civil Engineer. The Mechanical Engineering student may take courses in Machine Drawing which will supplement his work in the first year of Engineering Drawing.

In the advanced courses, the faculty attempts to stress the importance of ingenuity in work of an engineering nature. The courses offer such design problems as may actually be encountered at some future date in the industrial world.

Throughout the course of study in the Drawing Department, the faculty makes use of visual aids and devices. In this respect, scale models and objects are made use of to aid the student

B.S. in C.E. 1917, Missouri School of Mines.

in visualizing the problem at hand. Also, a recent addition has been the use of motion pictures in the various courses to aid in presentation of new ideas and subjects but also to simplify the presentation of many previously difficult principles.

Heading the department since the departure of Professor C. H. Black is the amiable chairman, Professor L. C. Christianson. Professor Christianson has been a member of the faculty of the Drawing Department at the School of Mines since 1946 and has been in the teaching profession since 1928.

M.S.M. graduates J. C. Forbes, F. E. Nevin, H. F. Thompson, and G. B. Wilson, along with W. C. Henrici, make up the faculty of the Drawing Department, each specializing in his own particular phase of the drawing which is presented.

The Mechanics Department under the efficient supervision of Dean R. Z. Williams is now handling one of its largest enrollments with a total of 1102 students engaged in mechanics courses. The classes in this department are designed to tie together the principles of pure sciences such as physics and math to practical advanced courses of construction and design taught in higher courses of the students' curriculum. The mechanics courses are therefore the beginning courses in the application of abstract ideas to useful engineering principles which the student will encounter after graduation. For these reasons every student is required to take the well known courses, "Statics" and "Mechanics of Materials". Five of the curricula have additional requirements of "Dynamics" and "Materials Testing Lab". For the most part these courses involve the solving of structural problems confronting the engineer in the construction of almost any undertaking.

"Materials Testing", the only lab course offered by the department, provided an opportunity for students to observe the actual practice of testing concrete, steel and wood structures for their ability to withstand tensile, compressive, and shearing stresses. One of the testing machines used in these experiments is capable of producing a pressure of two hundred thousand pounds per square inch. Although the labs, which are located in Harris Hall and in the Metallurgy Building, are being used at every possible time, the large number of students now taking the course has caused an acute shortage of machines with which to work. However, the equipment available is very good and plans are now being made to expand the facilities. When the expansion has been completed, the lab will enable students to participate individually in the operation of lab procedures rather than merely observe group experiments.

In addition to the undergraduate courses offered by the department there are seven advanced courses available to graduate students and to undergraduates as electives. These courses deal with advanced aspects of "Mechanics of Materials", Materials of Construction", "Elastic Energy" and several others.

Because of the dependence of the other curricula upon the Mechanics Department it has been and is an important part of the school.

Geology is such a broad science that it touches on every other science. It is the story of the origin and evolution of the earth and its inhabitants. At M.S.M. the study is designed to a great extent as a part of other fields of study. The Miner, Metallurgist, and Ceramist are confronted with many geological problems. They must be able to interpret these problems intelligently. Ability to classify minerals and sediments, locate and direct the exploration of ores, mineral fuels, and clay minerals is necessary for the engineer to operate a profitable business. Important to these fields are the courses offered by the Geology Department. In fact, such a large number of students pursuing these curricula pass through the department each year that it minimizes in number the "straight" geologist majors. The relative physical size of the department as compared to others is small. The number of new faces seen each semester, however, indicates that not a small number of students become acquainted with the Geology Department.

Head of the department is Dr. Oliver R. Grawe, a faculty member since 1928. To the student he is the "man with the amazing memory."

The new student entering the department is soon confronted with a myriad of strange terms. The language of Crystallography is like nothing he has heard before. With the aid of a large collection of wooden blocks cut into crystals he learns how to differentiate crystals and apply the terminology. The new student also studies the common minerals and rocks. A very fine collection of minerals is displayed in the museum.

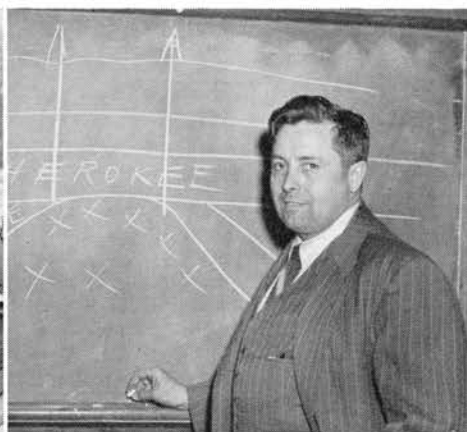

From this point on our new student turned veteran enters into a varied number of courses. If he is a Mining Geologist he takes Paleontology and finds himself up nights drawing curious fossils and ancient life. He learns more advanced methods of identifying rocks in Lithology. If he is a Petroleum major he studies the order and relative position of strata of the earth in Stratigraphy. If he is a Metallurgist his advanced work is in the study and application of X-radiology to chemical analysis. Advanced work for the Ceramist is offered in Optical Mineralogy, the determination of minerals with the aid of the polarizing microscope. The Geology major studies all of these mentioned and more.

Military Department

On Wednesday mornings from 11 to 12, weather permitting, M.S.M.'s largest class meets on the athletic field. This class consists of first and second year basic R.O.T.C. students under the direction of the cadet officers of the advanced R.O.T.C. unit and supervised by the army personnel stationed here. Training the largest number of men in its history here at Rolla, the department has enrolled some 377 men as compared to the first class of one hundred and seven men enrolled in 1873.

Under the provisions of the Morrill Act, under which the School of Mines was founded, four semesters of basic military are required for non-veteran students. On receiving credit for basic military, interested students may make application to take the advanced course in the R.O.T.C., which, when completed, qualifies them to receive the commission of second lieutenant in the Officers' Reserve Corps.

Since 1873, when the organization's activities began, the unit has instructed men in the principles of leadership, drill and command; hygiene and first aid; bridge and road construction; and combat intelligence. That this training for leadership is thorough may be seen in the military records of those who have completed the courses.

Colonel C. K. Harding, Professor of Military Science and Tactics, is a West Pointer of extensive experience. Lt. Colonel R. J. Wismer, who has just completed his first year at M.S.M., assists Colonel Harding in training the advanced men. Captain C. M. Messall serves as adjutant and also assists Colonel Harding in train-

ing the advanced men. Lt. Bloom, as supply officer, stoutly maintains that the field manual is always right—and the advanced student always wrong. Sgt. Leo White, well known for his uncanny memory, is an instructor in the basic courses. Sgt. L. C. Hess handles the unit's administration problems with his usual calm efficiency while Sgts. G. R. Edwards and G. G. Whitney issue the latest field manuals and the uniforms which adorn the regiment each Wednesday morning. Sgt. T. W. Callaway is an instructor and runs the rifle team with the guidance of an expert.

CHESTER KRUM HARDING
Department Chairman

Participation in athletics at the School of Mines is strictly a spare time endeavor due to the burden of academic requirements. Yet M.S.M. boasts continually outstanding varsity teams, and an extensive intramural program in which a large part of the student body competes.

S P O R T S

Jackling Gym
M.S.M. Athletic Headquarters

Athletic Department

In rounding out the education of the engineer, the athletic department at MSM is doing a remarkable job. Under its supervision, a smoothly operating athletic program has been instituted providing for the benefit of all the students. In addition to its sponsorship of varsity athletics, this department directs an intramural program as well as a course in physical education.

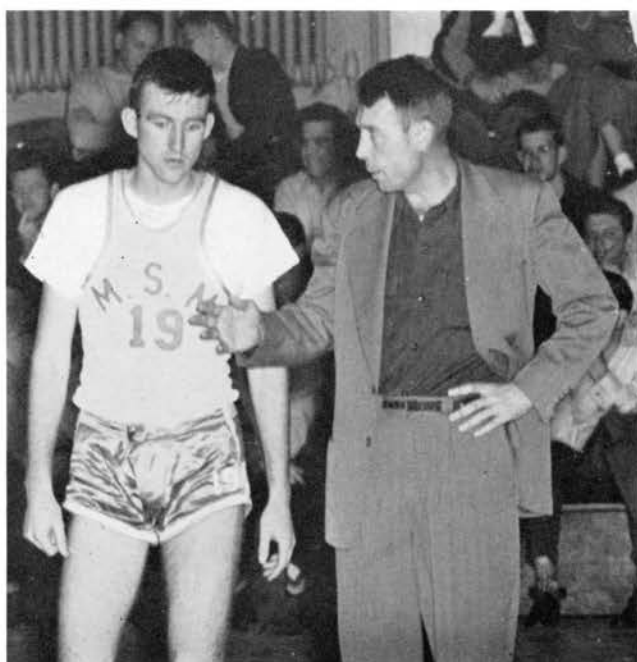

Heading the athletic department is Gale Bullman, with the title of associate professor of physical education. Coach Bullman, who starred on the same Washington University football team as the famous Jimmy Conzelman, recently signed a lifetime contract as head of the department.

Assisting Coach Bullman are Chester Barnard, who received his training at Southwest Missouri Teachers College in Springfield; and Ben Douglas, a newcomer to the staff, taking over ex-Coach Dwight Hafeli's position as head basketball coach. Douglas was trained at Grinnell College, later coached that school's championship basketball team, and in 1947 was football coach at Colorado College.

Throughout the year, Miner varsity aspirants have kept pace with the best that the Missouri Intercollegiate Athletic Association has had to offer.

M. I. A. A. Conference Champions

The conference record of the 1949 Miners is the record of a true champion. Meeting and decisively defeating every other team in the Missouri Intercollegiate Athletic Association, the Miners are undisputed titleholders. True, the team faltered twice in their first two games of the season, but these defeats merely smoothed out the kinks in the Miner attack.

Opening against Pittsburg State Teachers College at Pittsburg, Kansas, the MSM squad was forced to bow, 27 to 7, before a big, fast Kansas team that apparently could make no mistakes. In this, their first game of the year, the Miners had yet to develop the split-second coordination that was to feature their play against conference opposition.

Against Washington University the following week the team absorbed another defeat, 28 to 13. Although the Miners were beaten, the ball game was without a doubt the Game of

the Year from the standpoint of the valiant attempt the team made to overcome the more balanced Bear squad. Leading 13 to 12 going into the last quarter, Washington's sheer manpower was the decisive factor. It was in this game that an indication of Quarterback Art Schmidt's passing ability was given. It was Schmidt's passes to Fred Eckert that kept the Miners in this ball game when their running attack bogged down. The Miners' team, both defensively and offensively, played magnificent ball that day against a team that defeated them only on the strength of its reserves.

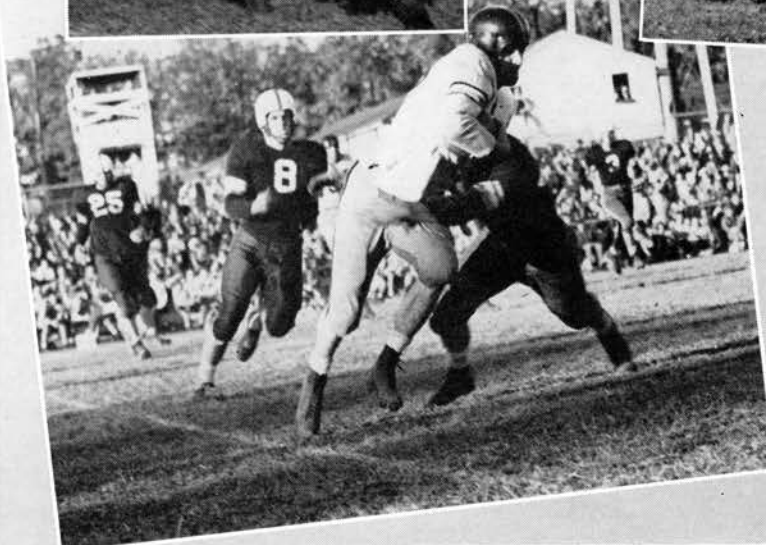

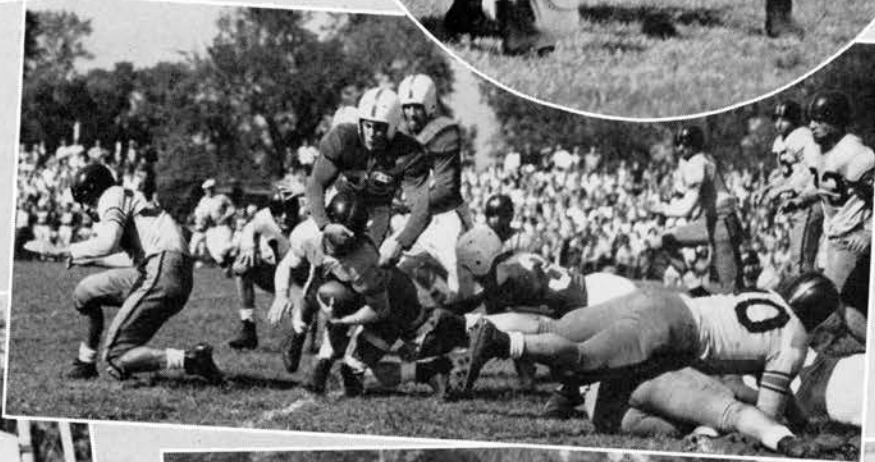

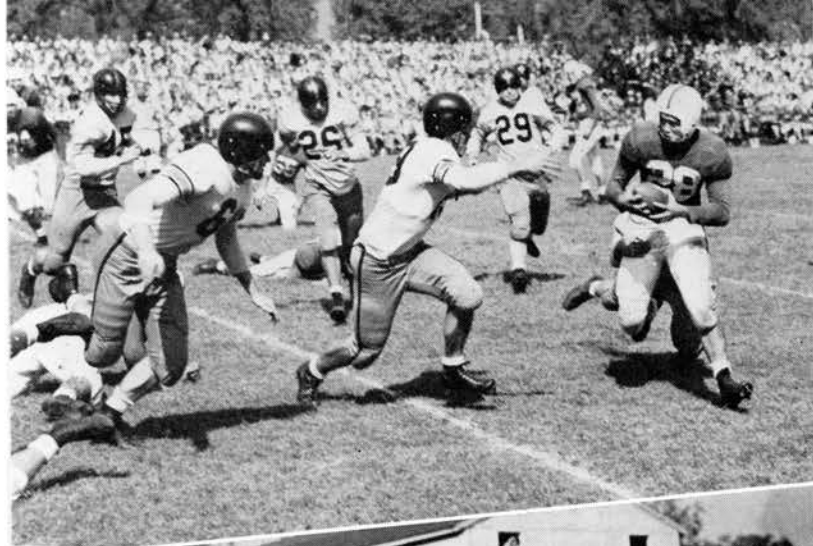

MSM 56, Shurtleff 0; that was the score of the first home game the Miners played in the '49 season. The team shook itself free from the doldrums that had plagued it the first two weeks, flexed its muscles, and smashed its way to a victory, which by its score gave an indication of the power that had been hidden

for two games. Now the Miners were a football team; they had developed timing, coordination, and above all, confidence in themselves. They had their first taste of victory—and it was pleasant.

Before a brilliant, well-balanced Miner passing and running game, the Maryville Bearcats were the first conference victims of MSM, falling 41 to 13. The Miners were now playing the type of ball they were capable of—fast, hard, and clean. The defensive platoon of Gale Bullman's two-platoon system did a magnificent job of scooping up the power plays of a Bearcat backfield that was rated best in the MIAA by pre-season predictions.

Warrensburg proved to be the next rung on the ladder to the conference championship that the MSM squad was building. Before a capacity crowd the Mules bowed, 31 to 0, as Dick Whitney and Don Dowling, Miner scoring leaders, slashed their defense to ribbons.

Conference Kings

Although the Kirksville Bulldogs outweighed us sixteen pounds per man, the Miners made it three straight conference victories as they defeated the Bulldogs, 20 to 6, on their own field. Even now the Miners were being tabbed as champions—provided they could tame the Springfield Bears.

And tame them they did! Playing the Bears on their own field, before their homecoming crowd, the Miners smashed them decisively, 35 to 7. There was no doubt about the outcome of the game after the second quarter. During the week preceding the Springfield game the Miners drilled till late hours beneath the lights of Jackling Field, and this time was well spent. The victory was doubly sweet to the team, because it was revenge on the school that had spoiled their homecoming the previous year. This victory gave the

1949 MIAA conference championship to the Miners, and well deserved it was.

The Cape Girardeau Indians came to Rolla November 5 to end the season, and the Miners successfully began the homecoming weekend with a 30 to 6 victory.

With an over-all record of six wins and two losses, the 1949 football season at MSM was a successful one. Eight men from the squad were picked on the first and second All-Conference teams. This in itself is a tribute to a great team, one of which MSM can be justly proud and speak with pride as conference champions.

Dowling crashes through.

Varsity Basketball

For the first time in the history of the basketball team at this school, the squad finished out of the M.I.A.A. cellar position. This fact, when considered alone, is not particularly commendable; however, when other factors such as injuries and ineligibilities are considered, the achievement is worthy of attention.

At the beginning of the season the basketball squad was strong. There were five dependable regular starters, plus ten well-balanced reserves to back them up. After the first of February, though, it was a different story. Two of the starters were declared scholastically ineligible, and injuries plagued the reserve strength. At the same time the team was moving into the thick of the conference race; and it was these games that counted.

Opening at home December 2 against Shurtleff College, the Miners, experimenting with various combinations, came out on the long end of the score, 47-45. Moving up to Washington U. for their second tilt, they were soundly trounced by a flashy Washington U. team, 59-30. Playing away from home the following week at Westminster, the team came out on the short end again, 55-39. Back home, they met Drury, coming up with a 63-54 win. The next week they skimmed by Harris Teachers College, 49-41; then smashed Scott Field, 66-45.

This was the end of the preliminary schedule. The squad began girding themselves for the conference wars, and on January 7 they took to the court against Kirksville. The ball club the Bulldogs brought down was big and experienced; they were rated as contenders for the top spot in the M.I.A.A. race, but the Miners, shooting and rebounding as they had not done before, eked out a 51-50 win.

Varsity Basketball

Burgett scores a crucial basket.

Strategy.

This was the last victory for M.S.M. in the succeeding nine games: Springfield, Scott Field, Warrensburg, Maryville, and Kirksville; then Springfield, Warrensburg, Washington U. and Cape Girardeau. All had the casualty-ridden Miners reeling on the ropes. With these nine losses went all vague hopes of a conference championship, but still the Miner team refused to give up. On February 18 they bounced back against Cape and squeezed out a 50-46 victory. Westminster came to Rolla the following week and the Miners re-vengeed their earlier defeat by easing around them, 64-63. In the last game of the season Maryville managed to break out a last-minute win by three points, 54-51.

A record of seven wins and twelve losses is not an impressive one. However, the team and the coach deserve the highest of praises for completing the schedule and ending out of last place despite almost every obstacle that could be encountered.

Varsity Track

The 1949 track squad is featured in this 1949-50 Rollamo. The squad, with a number of returning lettermen and a large group of new, enthusiastic athletes, had a successful season.

In their opening meet on March 26, at Columbia, the Miners came out second in the M.I.A.A. indoor meet, behind Maryville, by the score of 49½ to 40. The first place winners from M.S.M. were Pete Perino, broad jump; Cletus Voiles, pole vault; George Bock, shot put; and Rausch, Young, Sanders, and Harrawood, the mile relay. George Bock set a new conference record in the shot put with a distance of 45 feet 5½ inches; the old record was 44 feet 7⅞ inches.

In the next two meets the Miners came back strong by downing Drury and Westminster by the scores of 80½ to 55½ and 94 to 37. On April 16, the M.S.M. cindermen lost a triangular meet to Washington University, with Cape Girardeau taking third. High point men were

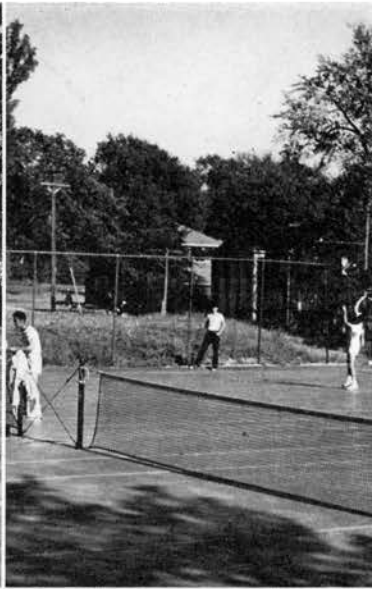

George Bock and Bob Schuchardt with 7 points each. The following meet the Miners slipped by Springfield, 70 to 66. Then they bit the dust of Cape in a triangular meet with the results as follows: Cape 65, M.S.M. 57½, and St. Louis University 47½.

The Miners worked hard and were well primed for the M.I.A.A. outdoor conference meet held on the M.S.M. track on May 14. The Miners looked at the heels of Maryville and Springfield, respectively. Finishing third, the M.S.M. cindermen were followed in order by Cape, Warrensburg, and Kirksville. Miner first place winners were Bob Schuchardt, 120-yard hurdles; Cletus Voiles, pole vault; and George Bock set a new M.S.M. record in the shot put with a 46 feet 1 inch heave.

Don Smith's 65 points topped the season's total scores. Other top men were George Bock with 64, Bob Schuchardt with 47½, Ted Reeves with 39½, and Cletus Voiles with 39.

TOP ROW: Perino, Slankard, Corbin, Turner, Harrawood, Young Smith. MIDDLE ROW: Shaffer, Dowling, Tietjens, Schuchardt, Rausch, Stevens, Sanders, Robertson. BOTTOM ROW: Shanafelt, Heckenberg, Reeves, Voiles, Grimsley, Bock, Dolecki.

Varsity Tennis

Opening the 1949 tennis season, the Miners quickly defeated Drury College. This victory was short-lived though as the Silver and Gold fell headlong into two consecutive defeats at the hands of St. Louis U. and the Springfield Bears. The Miners chalked up their second win of the season at the expense of St. Louis U. in a return match. The M.S.M. court men suffered another defeat by Washington U. and then lost the following match to Concordia Seminary. In the M.I.A.A. Conference meet the Miner team of Axsom and Williams finished second. Ray Morgan of the Geology Department coached the 1949 team.

Varsity Golf

The 1949 varsity golf team, though at times showing promise, was not too successful, losing three dual meets to Westminster, Drury, and S.M.S. However, in a triangular meet with Cape and St. Louis U., the Miners copped second place. On April 16 they repeated this feat in a triangular meet with Cape and Washington U. In the M.I.A.A. conference meet which was held in Rolla they finished second. In the conference meet Tony Pantaleo and Lloyd Youngs, both of M.S.M., tied for the medalist trophy. Pantaleo was medalist in 1948. John Steinmeyer of the Humanities Department coached the team.

Varsity Cross Country

In its third year at the School of Mines the varsity cross country team competed in three meets, losing all three by close scores. The team was composed of Melvin Shanafelt, John Bender, Walter Allison, Ray Maag, and Don Smith, the distance star, who coached and managed the squad. On the opening day of the season Don Smith set a new record for the M.S.M. course at 14:44. The second meet with Drury College held at Drury was lost by another close margin. Washington U. was the setting for the final meet. Don Smith again set a record on the Washington U. three-mile course.

Varsity Swimming

The 1950 Missouri School of Mines swimming team under the capable guidance of Coach Chester Barnard enjoyed a somewhat successful season although the record does not show it. Facing some of the toughest teams in this area the Miners came out on the short end with three wins and five losses. In their first meet with a strong Washington U. team the Miners fell, 57-18. The score does not show it but the Miners gave Washington U. plenty of trouble; every event being so close that they could have been dead heats. Washington U. came to Rolla for a return meet early in February and downed the Miners again, 47-28. There were two pool records broken that day by Washington U. in the 300-yard medley relay and 150-yard backstroke event. Bill Vose of the Miner team set a new M.S.M. record in the 440-yard free style with a time of 5:27.2.

Two weeks later they scored their first victory at the expense of Illinois Normal by a score of 49-26. Late in February the Miner tank team again defeated Illinois Normal, 59-16. In these meets the Miners took eight out of nine first places. Bill Vose led the parade with two firsts in the 220- and 440-yard free style. The other first places went to the 300-yard medley trio, Taylor, Hauser, and Bloess; Beverage in the 100-yard free style; Bloess and Taylor, first and second in the 150-yard backstroke; Smith and Greer took first and second in the diving event.

The M.S.M. tank men took the back seat in a meet with Bradley, 40-35, and in the next meet St. Louis U. swamped the Miners, 54-21. The St. Louis U. team took every first place, leaving only second and

 Vose, Beverage, Maltzahn . . . Getting set!

Varsity Swimming

third places to the Miners. The Billikens, led by McKenna and Durkin, shattered three pool records. Later in the season the Billikens again defeated the Miners, 52-23.

With the Miners at their best, they met Wentworth Military Academy and handed out a defeat, 52-20. Wentworth took an early lead by taking the medley relay, but it was their only winning event. Bill Vose, the Miner speed merchant, roared to top spot in the 220- and 440-yard free style event. Bill chopped 2.3 seconds from the old school record in the 440-yard free style. The most exciting and outstanding event of the day was the 100-yard breast stroke between Max Hauser and John Wintrode of the visitors. Hauser outstretched Wintrode by a few inches to win. The other top places went to

Maltzahn in the 50-yard free style; Bloess and Taylor took first and second in the 150-yard backstroke. Diving again saw Smith outpoint Greer for the number one position. The Miner's last win took place in the 440-yard free style relay with Smith, Greer, Bloess, and Maltzahn doing the honors.

Bill Vose was high scorer throughout the season with $71\frac{1}{4}$ points, followed by Maltzahn with $34\frac{11}{12}$, Beverage with $34\frac{7}{12}$, Hauser with 39, and Bloess getting $29\frac{7}{12}$.

The returning lettermen for the 1951 season will be Vose, Smith, Greer, Bloess, Maltzahn, Beverage, Allen, and Taylor. With these men back in the fold, the Miners should have one of the best teams in the history of the school.

George Bless, Harold Taylor, Gerry Zacher, Don Maltzahn, Leland Beverage, Bill Vose, Max Hauser, Jim Smith. BACKGROUND: Coach Chester Barnard.

Breaking with the gun.

Intramural

Cross Country

Gene Edwards of Triangle rose as the new champion of the cross country run. Gene broke the record previously held by Stan Dolecki of Pi Kappa Alpha with a time of 5:46.5. Gene Laytham, also of Triangle, romped in second to give Triangle an undisputed championship. Theta Xi took over second place with Plunkett running. Sigma Pi came through with points to hold down third place.

Basketball action.

Sig Eps' champion swimmers.

Intramural Athlete of the Year

Stan Dolecki of Pi Kappa Alpha fraternity was awarded the trophy as Outstanding Athlete of the Year. Stan achieved individual honors in 1948, breaking previous records in the cross-country race. As an all-around athlete he supported his team as guard on Pi K A's championship basketball squad as well as being an active participant in volleyball, softball, football, handball, and swimming.

Stan Dolecki.

Edwards and Laytham, Cross Country champs.

Sports

Swimming

Competition in the three-day swimming meet was not as close as might have been expected this year. After the completion of the preliminaries Sigma Phi Epsilon stood safely ahead of its nearest competitors, Triangle and Sigma Nu. In the finals the Sig Eps took four first places out of eight events to cop the trophy. Triangle and Sigma Nu tied for second place with Theta Kappa Phi trailing in third position, far ahead of all other contenders.

Guth closing in.

Swim Meet.

Start the game.

Pantaleo rebounding.

Tap in.

Rifle

Theta Kappa Phi replaced Kappa Sigma as the campus sharpshooters for this season. Individual honors went to Bill Sherburne of Lambda Chi Alpha, followed by Schemel of Theta Kappa Phi. Pi Kappa Alpha took second place, closely followed by Wesley and Triangle, in third and fourth, respectively.

Finale.

A base hit.

Intramural

Table Tennis

For the third consecutive year the Kappa Sigma table tennis teams have dominated that sport in the intramural program. Kurt Frank and Bob McGowan retained their doubles crown, handily defeating the contingent from Jackling Terrace in the final match. Roy Evans smashed through the winner's column to keep his singles crown. Jackling Terrace held down second place in the tournament with a second and fourth place in both events.

Weinstein and Chapman, straight from the shoulder.

TEKES—'49 softball champs.

Alley Oop!

Handball

Sigma Phi Epsilon again dominated the handball court, emerging this year without a defeat in doubles or singles competition. Dick Roerman replaced his brother as singles champ while Bill Roerman and Don Matson topped the doubles court. Nick Shurick of Jackling Terrace was the strongest contender for the singles title. Ed Kwasdas and Fred Eckert of Sigma Pi garnered second place in the doubles tourney.

Gorgeous George.

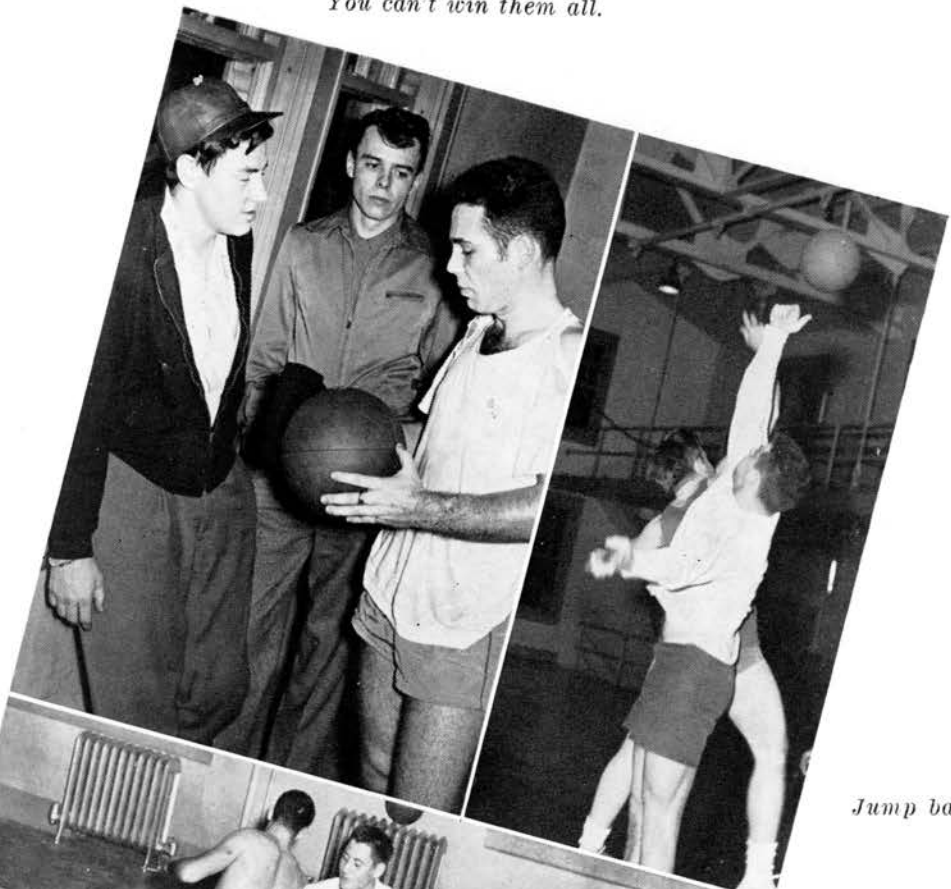

A new twist.

You can't win them all.

Sports

Basketball

Pi Kappa Alpha returned a veteran championship team to the hardwood court which again dominated a grand slam round robin affair. The Pikers suffered one defeat early in the season at the hands of an inspired Wesley team. Sigma Nu proved to be the toughest contender for the top spot, suffering only one defeat before they met Pi Kappa Alpha. In the crucial game Pi K. A. emerged as the champs while Sigma Nu held down second place. The rest of the teams were well spread out with Theta Kappa Phi in third place.

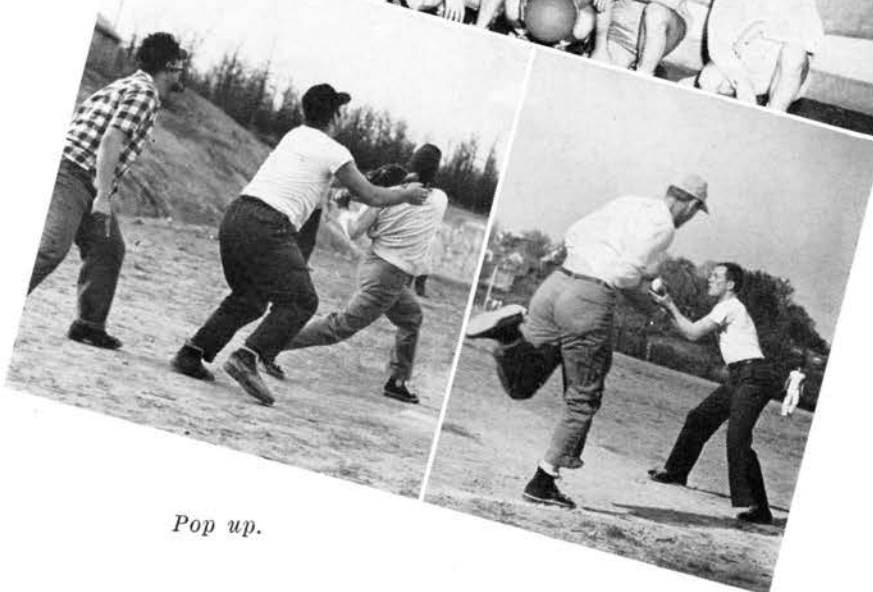

Jump ball.

Work out.

Pi K. A.—Basketball champs.

Pop up.

You're out!

Softball

Softball is swiftly gaining prominence as a major intramural sport. With many fine teams taking the field the competition is keen and has a big league atmosphere. In the spring of 1949 Tau Kappa Epsilon fought a good many teams but emerged as undisputed champions of the softball diamond. Lambda Chi Alpha, the champs of 1948, met their fate in the finals to hold down second place with Kappa Sigma finishing third.

Through participation in the activities of the organizations on our campus, whether it be social, honorary or professional, the Miner broadens his ties of friendship and obtains a well-rounded education, true to the tradition of our school.

ORGANIZATIONS

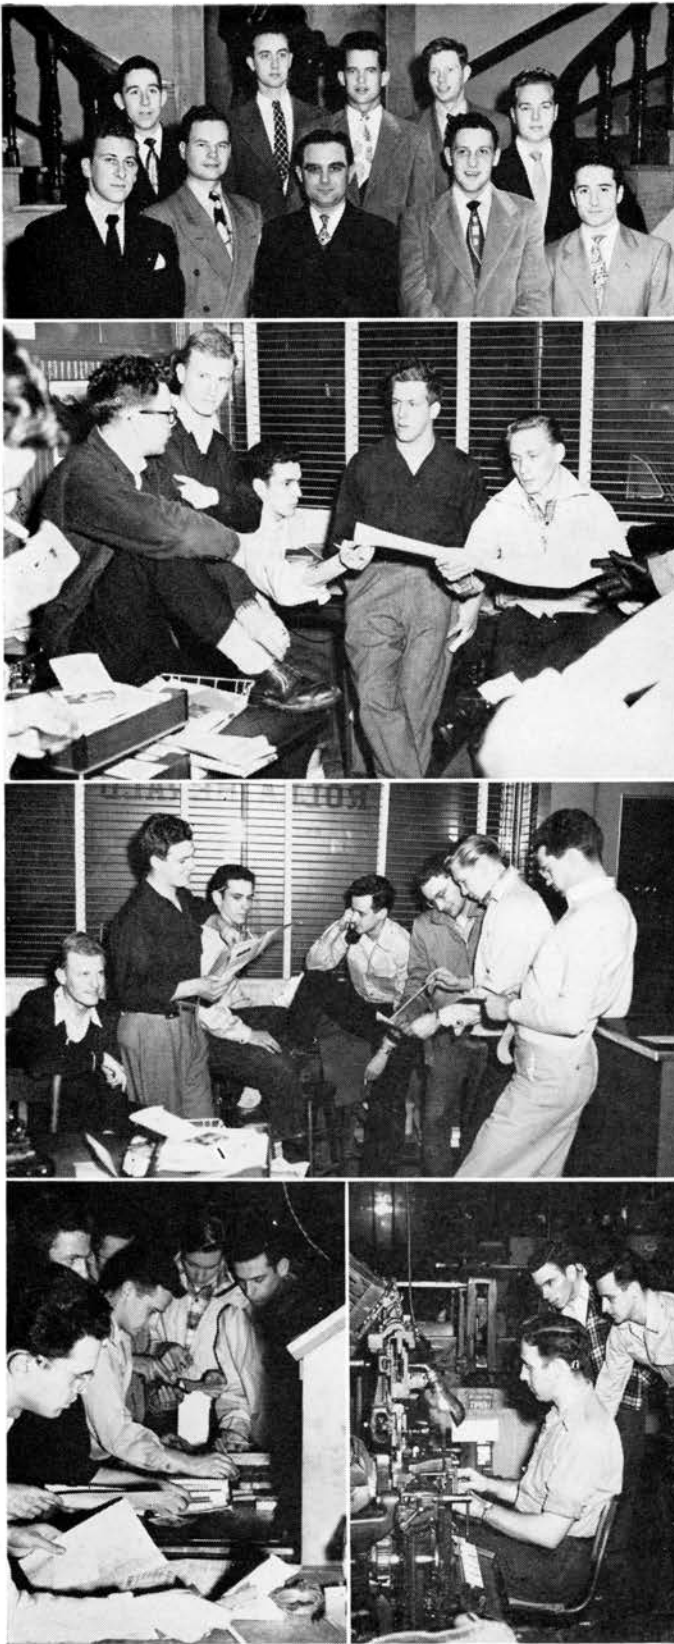

Missouri Miner

Less than twenty years after the founding of the school, the students made a positive step toward the publication of a school paper, and gave birth to The Notebook. Somewhat later the students began contributing articles to The Argus, the student publication of the University of Missouri. Finally in 1914, the Missouri Miner made its debut on the campus and has continued to function as a student project since that time. In the years which have passed the paper witnessed many changes, until its present-day development which we are familiar with.

This past year's paper has prospered under the guidance of the editor and his staff, and has succeeded in its ultimate aim of serving as a medium of exchange for the school. It has presented to the students a mode of self-expression of their ideas and projects. By presentation of the facts in an unbiased manner and by offering more than one school of thought on all controversial topics, the paper has kindled the minds of the students into formulating their own corollaries, thus promoting a more active participation by the students in school affairs.

On many subjects of doubtful controversy, the paper presented a definite platform. Among the policies advocated were the building of a Student Union, improvement of pre-registration, improvement of sportsmanship, and the admittance of negroes to the school. In the latter case a poll was sponsored in an effort to determine the opinion of the student body, with the results published and expanded upon in the Missouri Miner.

Two special editions were printed, the St. Pat's edition and the All Fools Day edition. The St. Pat's edition gave a complete coverage of all the social functions in addition to a pictorial pageant of the Queen and her Court of Love and Beauty. The All Fools Day edition

Missouri Miner

was spiced with satirical articles on policies, athletics, and social life; presenting a humorous anecdote on life here at school.

Yes, the paper prospered and stumbled through another bountiful year. Now we turn and look forward to the paper's thirty-seventh birthday, with the confidence that it will be a successful one.

Can we afford it? Editor Neidel and Business Manager Spackler.

Stegemeier, Chapman, Schmitt, Greaves, Gunther. FIRST ROW: Johnston, Greco, Maurer, Griffith, Hoffman, Ludewig.

Rollamo Board

The 1950 Rollamo was produced under the capable supervision of Editor-in-Chief Ed Kyburz. The man responsible for the financial stability of the yearbook was business manager Dick Stegemeier. These two men were elected to their positions by the 1948-'49 Rollamo Board.

A record-breaking senior class of over one thousand men made the task of compiling, editing, and producing the yearbook one requiring close cooperation and hard work by all staff members, board members and tryouts.

The editor and business manager very carefully picked the rest of the staff, considering always the men who could see their offices through. Dave Meskan was chosen as Organizations Editor, to make contracts for organization pages, collect copy, and aid in the layout of the book. Dick Bauer, Literary Editor, edited material turned in by his staff and from all the organizations. Harry Chapman made the sports section one of the finest in the history of the book. He was aided by a fine staff of sports enthusiasts. Bill Horst collected material on the huge senior class and the undergraduates as Classes Editor. Bill was helped a great deal by the tryouts. The advertising was obtained by Clarence Isbell. Jack Maurer held the office of Associate Editor. The excellent photography was accomplished by Bill Cox, who did a commendable job. The minutes of the meetings and the plans of the book were kept in order by our Secretary, Jack McNichols.

The 1950 Rollamo Board, their capable advisor, Prof. J. J. Jelinek, and the many tryouts deserve the congratulations of the student body for a job well done.

At the helm.

Student Council

It is the purpose of the Student Council to stimulate "school spirit," to exercise a general supervision over all student activities, and to form an official contact between the student body and the faculty.

The Student Council handles the annual elections of class officers and other functions. The outstanding accomplishments of the past year were the solution of the campus parking problem, the formation of a Campus Improvement Committee, the development of freshmen rules, and the purchase of an electric scoreboard and clock for the athletic field.

The Student Council is composed of a representative from each of the social fraternities and an equal number from the independent students. Representatives are awarded emblem sweaters for a year's service on the council.

Independents

The "Independents" was recognized as a campus organization in 1935 to represent all men not affiliated with a social fraternity in student government and student affairs.

All non-fraternity men are considered Independents and are thereby eligible to join the Independent organization and have a voice in campus activities.

The Student Council and St. Pat's Board are among these activities and the Independent student representatives are elected from the Independent organization.

The social interests of the Independent students are also furthered by this organization. The annual Hayride and Hog Dog Roast on the eve of Homecoming was again held. The Independents "outing", held each year in the late spring, is another memorable occasion. Inaugurated this year was an "Open House Party" following the formal dance during the St. Pat's holidays, and the reception of this party by all students proved this should become an annual affair.

The yearly battle between the Greeks and the Independents over class elections was again staged, with the Independents taking the majority of the offices.

In the past few years the prominence of the Independent organization has been felt and the future promises a strong and successful Independent student body.

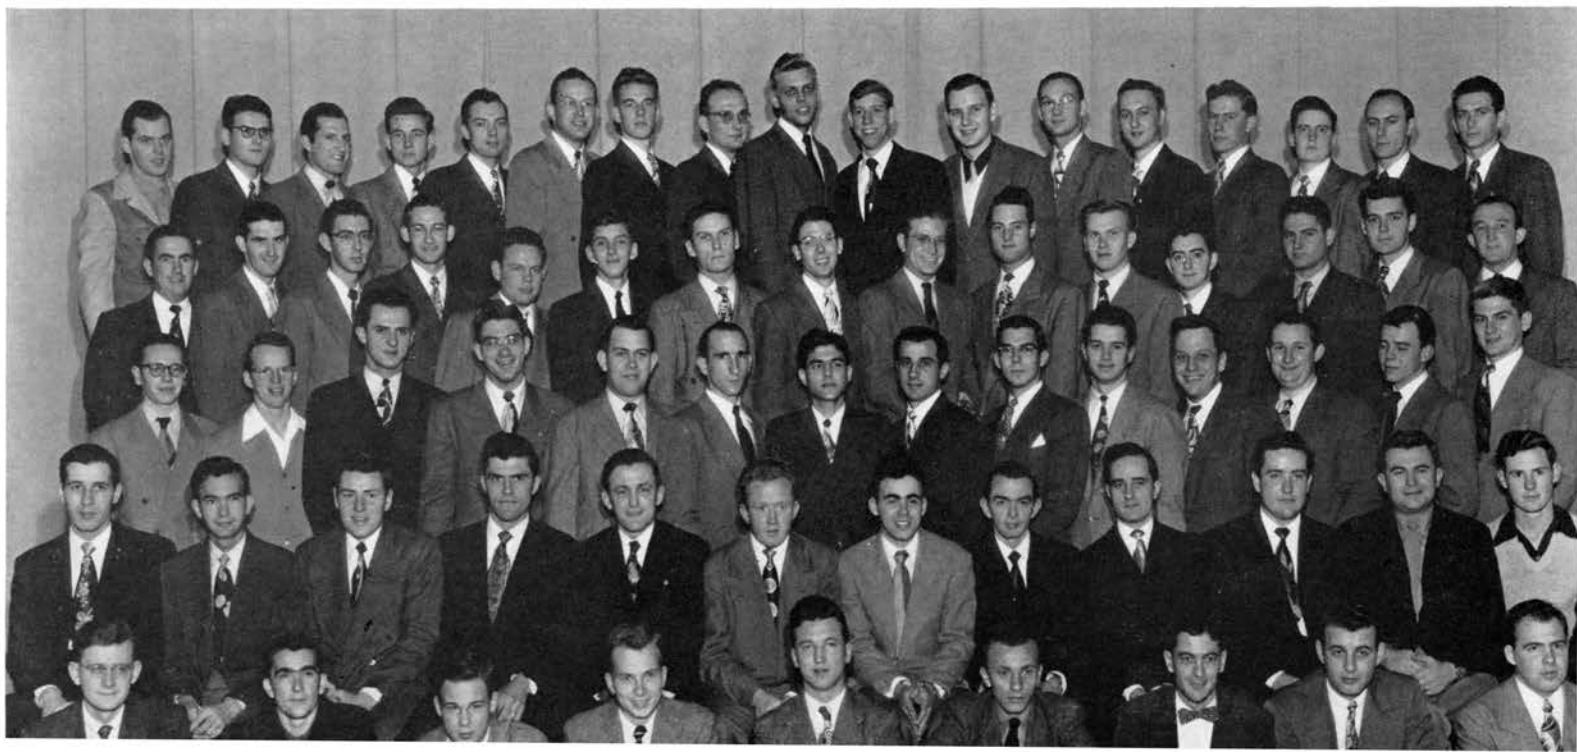

Free wheelers.

Phi Kappa Phi

The honor society of Phi Kappa Phi was founded in 1897 to provide an honor society dedicated to Unity and Democracy of Education and open to honor students from all departments of American universities and colleges. Its prime object is to emphasize scholarship and character in the thoughts of college students, to foster the significant purposes for which institutions of higher learning have been founded, and to stimulate mental achievement by recognition through election to membership.

The Missouri School of Mines chapter was chartered in 1920. The chapter has sponsored campus speakers, awarded Book Plates to each student who maintained a grade point average of 2.00 or better for two semesters, and maintains an active student loan fund.

Tau Beta Pi

The Missouri Beta "Wheels" of Tau Beta Pi have been active here since 1906. The Tau Beta Pi Association pursues recognition of distinguished scholarship and exemplary character in engineering students, as well as the attainments of alumni in the engineering field.

Our outstanding contribution to M.S.M. this year has been the tutoring service, designed to guide Frosh and Sophs in the fundamentals of math, chemistry, physics, etc.

Within, the chapter suffers from growing pains resulting from the wealth of inspiration received by our nine delegates attending the 44th annual national convention of Tau Beta Pi held at Purdue University, October 13-15.

The big guns.

Blue Key

Blue Key Freshmen smoker.

Big Keys.

Blue Key is a national honorary service fraternity. The real purpose of Blue Key is expressed in its motto, "Serving I Live." New members are chosen on the basis of character, scholarship, student activities, and service. The membership is limited to a definite number of graduate and undergraduate students and faculty members.

Services rendered during the past year include the annual publishing of the student directory, assisting in the Parents Day, Homecoming and St. Pat's celebrations, and introducing the school to the incoming freshmen by means of two very successful orientation smokers.

On February 18 the M.S.M. chapter was host to members of other Blue Key chapters of this district for the Regional Convention.

Theta Tau

Theta Tau is a professional engineering fraternity which draws its membership from men who show promising engineering ability, standard scholarship and personal worthiness. The purpose of Theta Tau is to perpetuate a high standard of professional interest and ethics among its members.

In the past few years Theta Tau has initiated a series of human engineering lectures. The speakers at these lectures have been noted persons in the fields of Sociology, Philosophy, Theology and Psychology. The purpose of these lectures is to bring to the student a broader and clearer viewpoint on human affairs.

Keramos

Keramos is a national professional fraternity organized to promote scholarship and character in the thoughts of ceramic students, and to promote interest in ceramic art, technology and engineering. The Missouri Chapter of Keramos was established here in July, 1947.

The outstanding activities of the past year included Parents Day exhibits, the showing of technical and industrial films for the entire student body, and the presentation of awards to the outstanding junior and senior in the Ceramic Engineering Department; also the policy of presenting incoming freshmen with ash trays bearing the school seal.

The student members of the organization are chosen on their records of scholarship, character and promise of success in the ceramic field.

Alpha Chi Sigma

Alpha Chi Sigma is a professional fraternity open to any student who intends to make some phase of pure or applied chemistry or chemical engineering his life work.

The organization was founded in 1902 on the campus of the University of Wisconsin. The organization is unique in its purpose, as the contacts gained in college are continued after graduation into industry.

The Beta Delta chapter here on the campus of M.S.M. was founded in 1936; since that time it has initiated into the ranks over three hundred undergraduate chemical engineers. Dr. W. T. Schrenk, chairman of the Department of Chemical Engineering, is now the Grand Master of Ceremonies of the fraternity. The chapter advisor is Dr. W. H. Webb.

Alpha Phi Omega

The Beta Omicron Chapter of Alpha Phi Omega Fraternity was chartered March 12, 1939. This national organization for college men is the only fraternity which is devoted essentially to service. This service embodies four fields of activity: Service to study body and faculty, service to youth and community, service to the chapter, and service to the nation as participating citizens.

Among the A.P.O. projects for the 1949-1950 school years were: Desk-sized blotters for all students, decorating the gym for Parents Day dance and dinner, guides for Parents Day, book exchange, motor pool.

The new student lounge is located in the northeast corner in the basement of the Rolla Building, and is available to all students for their use at all times.

Pershing Rifles

Early last spring it was felt by certain members of the Detonators that affiliation with a national organization would give the needed impetus to a new military organization. It was with this in mind that a charter from the Pershing Rifles was secured. Early in April 1949 we became known officially as Company K-7.

Under the direction of Lt. Bloom of the staff of the M.S.M. R.O.T.C. Department, we have had movies, lectures, and military demonstrations on the programs at our semi-monthly meetings. On the more serious side, honor guards have been furnished for many of Rolla's returning war dead.

Company K-7 has been honored to be allowed to have its own company on the regular Wednesday drill periods and will furnish a crack drill squad for the regular government inspection this spring.

Student Chapter M. S. P. E.

The student chapter of the Missouri Society of Professional Engineers is now recognized as one of the most important organizations on the campus.

This organization endeavors to unify the different curricula on the campus and to provide a common ground where students may discuss problems common to all types of engineering.

The principal project this year was to provide complete information concerning the Engineer in Training Program.

The student chapter is a small part of a progressive program designed to align all engineers, through registration, with one organization for the benefit of the engineer and the public.

American Foundrymen's Society

The growth of the activities of the A.F.S. student chapter during the past year has been remarkable. A great deal of this has been due to help from the St. Louis chapter, and has resulted in increased interest in foundry work by students in many departments on the campus.

The society entertained many guest speakers at their monthly meetings, these men being well-known representatives of the castings industry. With the Metallurgy Department boasting a new foundry, and with a foundry shop course being added to the curriculum, the A.F.S. can only look to even greater interest in the foundry industry on the part of many students.

Photo Club

The Photo Club was organized at the Missouri School of Mines for the promotion of more interest in photography in and around the school. This year the members were provided with a new and better dark room in the basement of the Rolla Building.

The meetings are held once every two weeks. Every other meeting is a business meeting and the other meetings are devoted to educational talks given by prominent studio photographers on subjects such as lighting, exposure, and development of film. A dark room attendant also gave a talk on the methods and procedures of printing negatives.

American Road Builders Association

The student chapter of the American Road Builders Association was formed last year at the Missouri School of Mines under the able leadership of Lee Dougherty and guidance of Professor Butler. The name approved for this group was the Enoch R. Needles Chapter, in honor of one of the alumni of this school in Civil Engineering and at the present time president of the parent organization.

The meetings for the year have revolved about the theme of highway work and many of the speakers have been from the Missouri State Highway Department.

As a fitting climax to a good year the A.R.B.A. announced that the Missouri School of Mines chapter had received a certificate for being the outstanding student chapter of the year.

The Big Road Builders.

Glee Club

The M.S.M. Glee Club, one of the oldest organizations on the campus, has, under the very capable leadership of its new director, Mr. John M. Brewer, accomplished its two-fold purpose during the past year.

This purpose consists primarily of providing a means of entertainment and relaxation for the students active in the organization; and secondly, of entertaining those people who cannot participate. Attainment of this purpose came when the Glee Club traveled to Lindenwood College in December where the women's glee club, in conjunction with the men from M.S.M., presented the annual Christmas vespers.

Also on the schedule were: a trip to Stephens College in Columbia, a trip to radio station KFUE in St. Louis, and the presentation of a spring concert here at M.S.M. Besides these programs, the Glee Club presented several musical selections for the parents at the Parents Day banquet in October, and for the December convocation.

Music rehearsed and presented at the various programs during the year consisted of a seventy-page cantata and the ever-popular songs: "Night and Day," "Dancing in the Dark," "I'll See You Again," "I Love a Parade," "Just a Cottage Small," "Riff Song," "When Day Is Done," "Wanting You," "Hallelujah," "Strike Up the Band," "Your Land and My Land," and "March of the Musketeers." Old favorites sung by the Glee Club were: "Fight, Missouri Miners," "The Lost Chord," "Tumblin' Tumbleweed," "Surrey with the Fringe on Top," "Riders in the Sky," "Meadowlands," "The Whiffenpoof Song," "The Soldiers' Chorus," and "This Is My Country."

In January a key was presented to each member who had shown an active interest in the organization for two semesters.

*"M" Club officers.
Six men on a couch.
Can't win games this way.*

"M" Club

The "M" Club was organized in 1939 to solidify the feeling of fellowship developed among the teammates of varsity athletics. The purpose of the club is the betterment of sportsmanship and school spirit on the campus as well as the advancement of a well-rounded intramural program.

To stimulate intramural competition an "Intramural Athlete of the Year" award is given each year to the man who has shown through his sportsmanship, athletic ability and cooperation with his teammates that he is the all-around intramural athlete of the year.

The "M" Club also sponsors the "Pigskin Prom" in the fall semester, and the "Varsity Gaieties" in the spring. Funds obtained from the concession stands at varsity games are used to purchase special equipment for the athletic department to aid varsity sports.

Baptist Student Union

The Baptist Student Union was organized at M.S.M. in the summer of 1947. Since that time the membership has grown until at present it is near fifty. The purpose of this group is to promote Christian fellowship and entertainment for interested students.

Regular monthly meetings, featuring speakers of interest to the group, are held. This formal meeting is followed by a fellowship hour consisting of games or singing and refreshments. In addition to these, other activities are planned frequently. For the past year these have included: Sunday morning breakfasts once monthly and occasional outings. For the grand finish to this scholastic year another banquet is planned before the end of the spring semester.

Tech Club

The Tech Co-operative Club is a comparatively new but prominent club on the Missouri School of Mines campus. It has a membership of approximately one hundred students and is governed by a Board of Control consisting of a president of senior standing, two juniors and two sophomores, plus a secretary-treasurer and a business manager. The club's constitution was approved in November of 1948. The constitution states that it is the duty of the Board of Control to keep the house going and to help form the policies of the club. Last semester the club celebrated its first birthday in the "Tech House" at 1304 Pine Street.

Even though the membership of the club is large, there is still room for making many new friends. Each month the Tech Club has a business meeting to discuss new and old problems. At the end of the fall semester the club said farewell to its president, Andy Andreason. It was at this meeting that the club held a rush night so that all new and prospective members could learn more about the club and its functions, meet the active members, and enjoy free smokes and cokes.

Tech Club

The Tech Club has climbed high in the intramural standings since its entrance into competition last fall. Many members of the club are active in campus organizations such as the St. Pat's Board, Student Council, Independents, class offices, and the professional and honorary societies on the campus.

The main objectives of the Tech Club are to maintain high nutritional standards for its members, develop school spirit, and the encouragement of scholarship. Because of these motives and attainments the Tech Club has earned its place on the campus.

Gamma Delta Assn.

Gamma Delta is an international association of Lutheran students organized to encourage a study of the Bible, to promote leadership in the church, and to promote fellowship within the school and between other colleges and universities.

The Alpha Phi chapter was installed on the M.S.M. campus on February 4, 1945, and in the past five years has made its presence on the campus well known.

This past year our cross-country team captured fourth place in the annual intramural race held at Homecoming. In other intramural sports

our teams proved stiff competition and finished well up on the list of total intramural points.

A glance at the social highlights of the past year brings to the remembrance of all members the Harvest Party and the grand and glorious Christmas Party. The year was quite well rounded out with the Parents Day and Homecoming festivities, and the never to be forgotten St. Pat's celebration.

Alpha Phi congratulates their graduates of this year for the earnestness that they have shown both in the chapter and in the school. We sincerely hope that we can do as well in the future.

Engineers Club

The Engineers Club has been organized on the M.S.M. campus for many years, being the oldest of the student "co-ops". This organization was founded to obtain better and more economical meals for many of the Independent students. The club not only maintains a high standard of living for its members, but also tends to promote fellowship and stimulate interest in campus activities.

Members of the club will be found taking part in the intramural sports program and in most of the campus organizations. They also take an active part on the M.S.M. varsity teams.

The Engineers Club is governed by a Board of Control, the members of which are elected on the basis of capability and personality. The recent Board of Control has done much to improve the club during the past year.

Alpha Psi Omega officers.

Alpha Psi Omega

Alpha Psi Omega is a national college dramatics society. It was organized for the purpose of providing a reward for students who have distinguished themselves in college dramatic productions. The society is purely honorary. Students may qualify for membership by faithful work in playing a definite number of major and minor roles in the plays given by the regular dramatic club of the college. On the M.S.M. campus the dramatic club is the M.S.M. Players.

The M.S.M. chapter of Alpha Psi Omega is very fortunate in having a man like Carl E. Niles as faculty director. This organization can boast one of the most regular guys on the campus for a leader.

M. S. M. Players

The M.S.M. Players is as its name suggests, the dramatic group of this campus. It has shown considerable improvement in the past few years and at the present time its productions are well attended and enjoyed by students and faculty members.

The objectives of the club are the development of greater dramatic ability among the interested students and the attainment of a greater knowledge of the well-known dramatic artists and arts.

This year's production, "Yes, My Darling," was the finest yet produced and was played before full houses on all three nights of its showing.

The talent shown by the student actors and actresses, under the capable direction of Mr. Carl Niles, greatly exceeded the expectations of an appreciative audience.

Wesley officers.

Wesley Foundation

The local chapter of the Wesley Foundation was founded on the M.S.M. campus in 1945 to promote Christian fellowship and higher ideals. Membership is open to all students.

The Wesley Foundation is an active participant in the intramural athletic program on the campus. They always field a good basketball team as well as tennis team which is hard to beat.

One of the highlights of the social calendar is the annual trip to the Lake of the Ozarks to the State Wesley Foundation Conference. Other events are the Halloween party, hayrides, St. Pat's activities, and trips to St. Louis.

Rev. Ralph H. Hicks, minister of the First Methodist Church, is the advisor of the organization.

University Dames

The National Association of University Dames was founded at the University of Chicago in 1921. M.S.M. Chapter, composed of student wives, was established in 1941 and has a membership this year of 100 members. The society strives to promote a spirit of friendliness, furnish a means of entertainment and to stimulate general cultural among its members. It is sponsored by a board of faculty wives headed by the wife of the dean.

Special interest groups within the organization provide its members with an opportunity to participate in a variety of activities. These subsidiary groups are Mothers Club, Work Basket, Drama Club, Glee Club and card clubs.

In addition to guest speakers at monthly meetings, the annual fall tea for prospective members, a fashion show and Christmas party highlighted a very successful year.

Kappa Alpha

Kappa Alpha is one of the older national fraternities, having been founded at Washington and Lee University in 1865. Beta Alpha Chapter was established on this campus in April of 1903. Known nationally as a fraternity of Southern Gentlemen, the men of the Kastle at M.S.M. have strived to maintain their reputation for friendliness and genuine hospitality.

Situated at the top of State Street, the chapter house was the scene of many and varied KA activities throughout the 1949-1950 school year. The fall pledge dance of Parisian Apache motif was one of the year's best at the Kastle, and set the mood for the remaining social events. A Christmas formal was the feature of the holiday season, and the annual Robert E. Lee banquet followed soon after, opening the new year. Of course St. Pat's, with its myriad of parties, highlighted the year for all Miners, and the KA's showed themselves to be loyal followers of our patron saint.

Improvements and redecorations in the chapter house have been constant throughout the year. Continued support from the chapter's alumni, coupled with hard work on the part of the members and pledges, have made this possible.

In athletics, campus activities, and scholastic work, Kappa Alpha plans to continue this year's progress as the fraternity ends another busy year at the School of Mines.

Kappa Sigma Fraternity

Kappa Sigma was founded at the University of Virginia in 1869. The Beta Chi chapter was installed at Missouri School of Mines on November 5, 1903, and was one of the original three social fraternities which were chartered here in that year.

Since then Beta Chi has taken a leading part in the activities of the school which include intramural sports and the annual Inter-fraternity sing.

The activities in sports cannot overshadow the social affairs of the fraternity. The two biggest affairs at the Kappa Sig house are their annual Pledge Formal and the Kostume Karnival, which is one of the best of the year. Improving from year to year, the last topped them all.

The choral group from the house made a great showing at the Inter-Fraternity Sing to capture highest honors and add another beautiful plaque to the house collection.

As the Christmas spirit was drawing to its peak, Kappa Sig gave a Christmas party for

the needy children of the area. Bill Koch was Old St. Nick and Bob Knauer did a splendid job of arrangement.

Jack Koch and Dan DeVaney have skillfully eluded the junk man for the year but if they leave those cars out front any longer he'll take them for sure. Jim Spiniello is still arguing against Joe Geers' and Bob Hirsch's women exchange and letting George (Goober) Mabie and Sam Shaw III in the front door when they come trotting home after a Wednesday afternoon down at the Blue Room. Tony DiPrimo has given Roy Shourd, Ted Ruppert, and John Evans jobs as sump pumpers on his roughneck crew. Thanks, Boss, jobs are hard to get. The Old Lady of Threadneedle Street, August (Oogy) Vogler, is about to retire; he slept so much of the winter that they had to call him out on Ground Hog's day. Whether or not he saw his shadow I don't know.

Another semester draws to a close and we still haven't gotten rid of Kirt Frank and Dick Marting. Some fellows just aren't satisfied with one little B.S.

Lambda Chi Alpha Fraternity

One of the foremost organizations on the campus in the early 1900's was a group who called themselves the "Muckers." When war and army service began to break up the group they decided to cement their relations as brothers by joining a national organization. President Harry Kluge was sent to Indianapolis, where he was initiated into the relatively new Lambda Chi Alpha Fraternity. He returned to Rolla, and on April 21, 1917, formally installed Alpha Delta Zeta of that fraternity.

Since that time, 377 brothers have become a part of its history. They have accepted its guidance and grown to manhood under it. In return they have left a part of themselves be-

hind to build the chapter in personnel and stature.

For the past 28 years the home of this chapter has been the historic old Campbell place, an 86-year-old mansion known on the campus as the "Little Red Playhouse." Over these years the members of this chapter have built up an outstanding, amiable, cordial, and sociable reputation.

This is the last year for the "Little Red Playhouse," and soon the chapter will move to a shiny new home. The cover will change, but a chapter is the product of tradition and the men who built it.

Pi Kappa Alpha

The Alpha Kappa chapter of Pi Kappa Alpha was installed on December 2, 1905. Since its installation the chapter has continually maintained a leading role in scholarship, social functions, and campus activities on the M.S.M. campus.

Pi Kappa Alpha captured the social spotlight during the past year by being the only fraternity to sponsor four dances: The fall Pledge Dance, the Winter Formal, the "Hobo Hop," and the Spring Dance. The Winter Formal was the only formal sponsored by a single fraternity. Parents Day, Homecoming, Founders Day, Mothers Day, and the St. Pat's celebration rounded out the year's social program.

An outstanding basketball team outclassed all opponents to add another first place trophy to the collection. The "Pikes" also made a fine showing in all other intramural sports, including a second place in rifle matches.

IKA's proved themselves to be the campus leaders this past year as evidenced by their presence in so many campus organizations both as members and officers. Among the offices held by "Pikes" are president, vice-president, and secretary-treasurer of Blue Key; president, treasurer, and corresponding secretary of Theta Tau; vice-president, treasurer, and secretary of A.S.M.E.; president of A.I.Ch.E.; president and vice-president of S.A.M.E.; editor-in-chief, literary editor, classes editor, associate editor, and secretary of The Rollamo. This is also the second consecutive year that at least one "Piker" has been a recipient of the Theta Tau freshman recognition award.

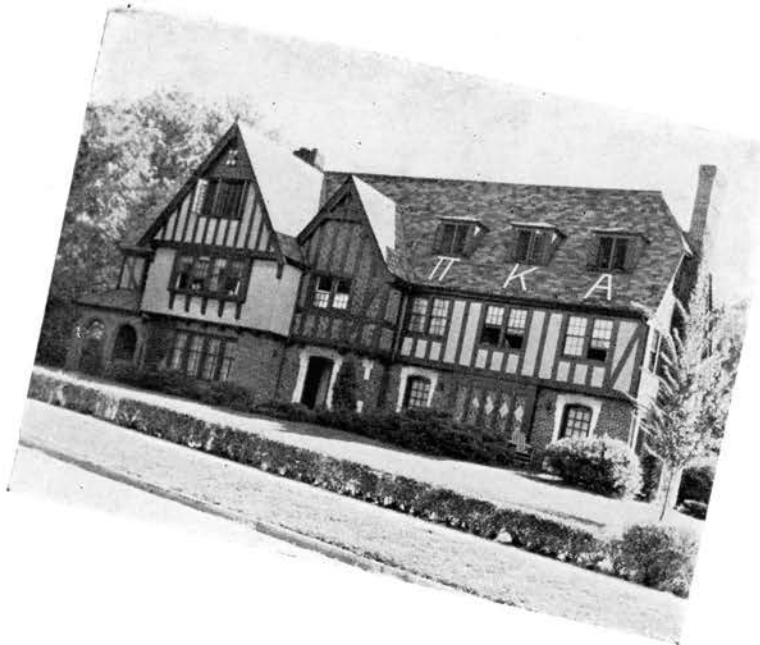

In addition to these wide and varied achievements on the campus, the "House by the Highway" received a face lifting early in the fall. Already the most beautiful house on the campus, it became more so through a complete re-decorating job, from floor to ceiling, of the entire first floor. Bouquets to the IKA Mothers Club for their valuable contributions.

All of these accomplishments have helped to make the school year of '49-'50 one of the most outstanding in the history of the Alpha Kappa chapter of Pi Kappa Alpha Fraternity.

Sigma Nu Fraternity

The Gamma Xi chapter of Sigma Nu Fraternity was the first social fraternity on the M.S.M. campus, being chartered in 1903. Since this time it has grown into one of the largest and most financially settled organization on the campus.

Throughout the ensuing years, Gamma Xi has been an active participant in all campus functions and inter-fraternity activities. Always one of the strong intramural contenders, Sigma Nu placed first in football, tied for second in swimming, and were one of the strong contenders in basketball. Third place was also taken in the inter-fraternity sing. Sigma Nu has always had good representation on the

Miner Board, Theta Tau, and other such organizations on the campus. The aim of the chapter, as it has been in the past, is to develop the character and personal talents of its members, that they might leave its ranks bearing the distinction of gentlemen.

The social committee of Sigma Nu did an excellent job in 1949 and 1950, for many successful parties were given at the Snake House. The Pledge Dance, Homecoming, the Christmas Formal, and the annual Yukon Party in 1949, and the St. Pat's parties and the Spring Formal in 1950 all attracted many Miners and their dates.

Sig Ep Wheels.

Dancing.

Poker and beer.

Happy kids.

Sigma Phi Epsilon

Missouri Gamma chapter of Sigma Phi Epsilon is now in its third year on the campus of Missouri School of Mines, and in that short time has grown to be one of the top fraternities on the campus, with many achievements to its credit.

Numbering about sixty in size, Sig Eps have taken part in all phases of campus life. The past semester they took permanent possession of the Inter-Fraternity Council Scholarship Cup.

Another first for Sigma Phi Epsilon came in the annual intramural swimming meet when their team brought home the championship trophy. Sig Ep also boasts a fine basketball team, a handball team, and excels in many other phases of intramural sports.

Sigma Phi Epsilon is also a campus leader socially. The past year was highlighted by the third annual Sweetheart Dance. Miss Roxey Carney was crowned Sig Ep Sweetheart, and her maids of honor were Miss Marjorie Semenske and Miss Betty Lovelace. The first Pledge Dance to be given turned out a huge success, and everyone got quite a laugh out of the skit that the pledge class put on. Three other dances, the Miner '49'er Dance, the Bowery Brawl, and the Sweater Dance, were all very successful.

Sig Ep also enjoyed giving their annual Tri-Sigma Christmas Party, held in conjunction with Sigma Pi and Sigma Nu, for the underprivileged children of Rolla.

Sigma Pi

Originating on the M.S.M. campus as the Prospector's Club, the Alpha Iota chapter of Sigma Pi was formally installed in May, 1933, and since that time it has maintained a position as one of the leading fraternities on the campus.

Our social calendar included such memorable activities as the Homecoming Drop-in Dance; the traditional "Gay Nineties" Dance; the Tri-Sig Children's Christmas Party, in co-operation with Sigma Nu and Sigma Phi Epsilon; the chapter Christmas Party, in which the value of the gift is secondary to the thought behind it; the St. Pat's celebration, which is the highlight of the school year and accordingly the gayest of our festivities; and last, but not least, our annual Spring Outing and Dance.

The men of Alpha Iota have wholeheartedly participated in the various organizations on the campus, and many of them have brought honor to the chapter as a result of the capable leadership they displayed in the offices to which they were elected.

In addition to campus activities, the actives and pledges alike devoted many leisure hours in preparing and laying a new sidewalk which greatly enhances the appearance of the house. There has also been much time and energy consumed in redecorating study rooms in the latest modes of interior styling, one in particular showing a definite and somewhat distressing trend toward surrealism.

Harmony.

There they go.

The good old days.

The chiefs.

Good day!

Love . . .

Tau Kappa Epsilon Fraternity

Tau Kappa Epsilon Fraternity was founded at Illinois Wesleyan University on January 10, 1899. Since that time it has grown to 73 active chapters scattered from coast to coast. On March 9, 1947, a charter was granted to Beta Eta chapter here at the Missouri School of Mines. After hard work and perseverance on the part of the charter members, TKE is gaining a recognized position on the campus in athletic and social events.

The TKE social calendar began in the Fall with a Pledge Dance followed by the traditional Carnation Formal. The second semester brought forth a novelty dance in the form of a French Underground with appropriate settings. As on every fraternity schedule the St. Pat's celebration was one of the highlights with TKE. Then, drawing the semester to a close in the Spring,

was the Spring Outing with a dance Friday night and picnic at Meramec Springs on Saturday.

TKE is gaining prominence in the field of athletics. During the past year, TKE won the intramural softball championship, losing only one game. Four of the TKEs combined their talents to win the Inter-Fraternity bridge tournament. One of our most prized trophies is the award for the Homecoming display. The scene depicted an Indian reservation with assorted collections of scalps, drums, tepees, and signs.

At the close of this semester most of the charter members will have departed, leaving the burden to younger, though capable hands. The charter members can be secure in the knowledge that TKE will be carried on with the same traditions and high ideals as before.

More pirates.*

Theta Kappa Phi Fraternity

Theta Kappa Phi was founded at Lehigh University in 1922, Mu Chapter being established at M.S.M. in 1936. The fraternity has as its goal the development of a high standard of social and intellectual fellowship among its members so that they may be better fitted to take proper seats in the universities and communities of America.

Theta Kappa Phi entered the social spotlight with three dances: The Fall Pledge dance, the Pirate Party and Winter Formal, and the Spring Formal. Homecoming, Parents Day, and St.

Pat's celebrations rounded out the year's social program.

Theta Kaps are represented on several varsity teams, and their intramural prowess is such as to be reckoned with in every sport.

Another year has passed and some members will be leaving, but one thing to be sure of is that they will leave with memories of college life that Theta Kappa Phi has made pleasant for them. The Theta Kaps hope to maintain their good reputation and to improve greatly in the years to come.

Theta Kappa Phi Fraternity

Attending as many classes as any student of M.S.M. is their black-faced Boxer, "Bolger". The town's daily newspaper affectionately named him "Rolla's ugliest dog."

Theta Kappa Phi's massive brick residence, whose sleepy appearance is contrasted sharply to the vitality of its members, is located at 707 State Street.

Theta Xi

Theta Xi Fraternity was founded at Rensselaer Polytechnic Institute, Troy, New York, on April 29, 1864. Alphi Psi Chapter of Theta Xi, the "baby fraternity" on the M.S.M. campus, was established here on October 8, 1949; its birth and growth are attributed to the worthy efforts of the members of the old Chi Sigma local organization. The TX men are proud to take their place among the fraternal organizations at M.S.M., and contribute to the many scholastic, social and intramural activities.

The school year of 1949-50 was a hectic but interesting one. Securing a house, furnishing and decorating required much thought, time and patience from all those concerned. Theta Xi's recognition and acceptance of Chi Sigma in October meant a revision in organization and new planning. With this came formal initiation, banquets, and finally a more closely knit and settled group.

Socially, Theta Xi has been "right there" this past year. The new convenience of the house helped make Parents Day, Homecoming, Christmas, and St. Pat's all gala and memorable celebrations. The Christmas dance at the College Inn of the Edwin Long Hotel is still a big favorite.

Graduation has claimed a number of chapter founder members, and the fraternity hopes they will meet with luck and prosperity. The future shows plans for bigger and better things and continued success.

Triangle Fraternity

The Missouri Mines chapter of Triangle Fraternity was installed on this campus on the 10th of December, 1927. The parent organization, from which this chapter evolved, was known as the "Grubstakers' Club," a dining organization. The Grubstakers were the first social organization to exist on the M.S.M. campus, originating here in 1902.

Triangle Fraternity was begun on April 15, 1907 at the University of Illinois. Its inception was the result of the expressed desires of a group of sixteen Civil Engineering seniors. These men were close friends and decided that they would spend their last semester of college living in the same house. This was in the spring of 1907. Groups at other universities began to take interest in similar organizations

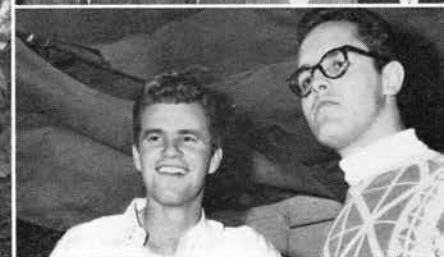

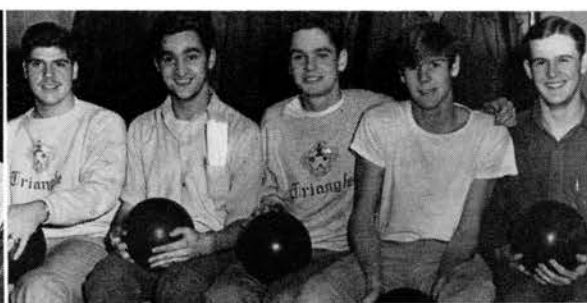

and soon these were joined together as a national fraternity. In 1921 a resolution was passed which permitted the chapters to accept for membership not only Civil Engineering students, but also students of all other branches of the engineering field. To this day Triangle has remained exclusively an engineering fraternity and at present there are seventeen chapters, one at each of the best engineering schools in the nation.

Members and pledges in Triangle learn the benefits of working together, whether it be on the playing fields of intramural or varsity sports or in the beautification of our home here in Rolla. Triangle is "a home away from home," where untried boys come as freshmen and well-rounded men leave as graduates.

*Which twin has the Toni?

*In the cooler.
The Big Boys.
Hey, bright boy!*

"All work and no play makes Miners dull boys." Let it not be said that Miners are dull by any standards. We are known to work hard and, on occasions, to play hard. Any form of social escape, from beer-bust to formal, presents such an occasion. Our St. Pat's celebration this year was the highlight of many such events.

BOB SCHUCHARDT
St. Pat of 1950

St. Pat's 1950

St. Pat arrives.

The Patron Saint of Engineers made his momentous entry into Rolla via Frisco Railroad flat car on the day of the annual celebration of St. Patrick's. Enveloped by the largest and most boisterous crowd of Miners ever to witness his arrival, St. Pat mounted his traditional conveyance and led the parade through the town and to Parker Hall on the M.S.M. campus. There the vociferous throng was entertained by His Majesty's annual message and the knighting ceremony which followed.

At the Costume Ball that evening, Bob Schuchardt, St. Pat of 1950, crowned his Queen of Love and Beauty, Miss Marilee Drake. The radiant Queen was attired in a very attractive white tulle gown of her own design.

The annual Sigma Nu Tea Dance highlighted the Saturday afternoon program. That evening the celebrators donned their formal raiment and danced to the champagne music of Lawrence Welk and his orchestra. Quickly thereafter, St. Pat departed for that Emerald Isle to watch over his subjects until his return in March '51.

Military Ball

Honorary Cadet Colonel and Cadet Colonel.

The annual Military Ball sponsored by the Society of American Military Engineers proved to be the social highlight of the fall semester.

Miss Marilee Drake, daughter of Dr. and Mrs. A. A. Drake of Rolla, Missouri, was commissioned as Honorary Cadet Colonel. Marilee is a blonde, blue-eyed beauty who is accustomed to being so honored. She has lived in Rolla for seventeen years and was valedictorian of her class at Rolla High School. In the fall of 1947 Marilee enrolled at Missouri University and was initiated into the Delta Delta Delta sorority. She transferred to Washington University in 1948, where she studied design in the College of art. During the past year Marilee has been attending the School of Mines for the purpose of acquiring several liberal arts courses before returning to Washington University.

Colonel C. K. Harding, P.M.S.&T. at the School of Mines, made the presentation of the commission of Honorary Cadet Colonel to Miss Drake, who was escorted by Cadet Colonel Ray Matlage. Miss Irene Matthews, retiring Honorary Cadet Colonel, was escorted by former Cadet Colonel Mel Callahan.
